The Great Depression of the 1930s set the stage for the greatest afforestation program the world has known when the Forest Service was given the task of planting shelterbelts from Texas to Canada in a zone a hundred miles wide The venture known as the Prairie States Forestry Project or the Shelterbelt Project resulted in the planting of millions of trees between 1834 and 1942 Today the millions of trees planted in the Depression stand as a monument to President Franklin D Roosevelt who originated the idea of the project and to friends of environmental concern everywhere Not all the trees are living and many of the belts have been removed in the interest of technological advances in Plains agriculture or the farmer s decision to increase his planting acreage Conservationists and spokesmen in government have become alarmed by the destruction of the belts The time has come to re evaluate the importance of trees to the environment of the prairies and plains of mid America for recent droughts again created a need to plant trees to combat erosion and to make the region more hospitable to the people who live there and who provide the world with its bread **Trees, Fruits, and Flowers of Minnesota** ,1899
