

The graphing calculators that are most commonly used in pre-calculus and Calculus I are the TI-82/83/84 series and the TI-85/86 series. Specifically, the standard TI-86 will be what this manual is based on, and is shown below on the right.

TI-83

TI-86

These calculators are similar to each other and both have the functionality needed for mathematics up through Calculus I. The main difference between them is the TI-83 is generally more user friendly, while the TI-86 has more features and functionality. Both calculators have a black and white screen on the top half and a large keypad on the bottom half. The TI-82 and TI-84 are very similar to the TI-83, and the TI-85 is very similar to the TI-86. Keep in mind that there are some subtle differences between calculators of the same series.

Below is a closer look at the keypads. Both have the same number of keys, but some are in different places and some are on one keypad and not the other. Both keypads have three "levels" of keys. As you can see, there is white writing on the keys
