Too Many Dogs Lalie Harcourt,Tina Holdcroft,Ricki Wortzman,2002-01-01 **Handbook of Quantifiers in Natural Language: Volume II** Denis Paperno,Edward L. Keenan,2017-06-30 This work presents the structure distribution and semantic interpretation of quantificational expressions in languages from diverse language families and typological profiles

The current volume pays special attention to underrepresented languages of different status and endangerment level. Languages covered include American and Russian Sign Languages and sixteen spoken languages from Africa, Australia, Papua, the Americas, and different parts of Asia. The articles respond to a questionnaire the editors constructed to enable detailed crosslinguistic comparison of numerous features. They offer comparable information on semantic classes of quantifiers: generalized existential, generalized universal, proportional, partitive, syntactically complex, intensive, modification, Boolean compounds, exception phrases, etc. and several more specific issues such as quantifier scope, ambiguities, floating quantifiers, and binary type 2 quantifiers. The book is intended for semanticists, logicians, and linguists interested in quantification in natural language and general linguistics, as articles are meant to be descriptive and theory independent. The book continues and expands the coverage of the *Handbook of Quantifiers in Natural Language 2012* by the same editors and extends the earlier work in Matthewson 2008, Gil et al 2013, and Bach et al 1995.
