book is not about managing the environment but about managing people in organizations governments and corporations to lessen environmental damage Topics include auditing education and training environmental reporting impact assessment and the Natural Step a Swedish NGO that advises on efficient material usage to increase profits and spare the environment Pub desc *Corporate Social Responsibility, Accountability and Governance* Istemi Demirag,2018-10-08 The business case for corporate social responsibility which suggests that socially and environmentally aware companies can expect to reap financial rewards is seemingly gaining widespread acceptance within the business community This is particularly apparent in the ever increasing number of prominent companies parading their social ethical and environmental credentials by producing paper or web based social and environmental or sustainability reports In so doing reporting companies claim they are demonstrating a clear commitment to transparency and accountability to their key stakeholder groups However in the prevailing voluntaristic business case centred climate within which such initiatives are taking place little thought appears to have gone into the question of how stakeholders other than the capital provider group can actually use corporate disclosures offered in order to hold management accountable for the social and environmental consequences of their actions While much corporate rhetoric abounds concerning notions of stakeholder dialogue and engagement rigorous analysis of the governance implications of their claimed commitment to the principles of corporate social responsibility is largely conspicuous by its absence *Corporate Social Responsibility Accountability and Governance* seeks to explore this missing link between CSR and associated reporting initiatives and governance mechanisms that are capable of embracing true stakeholder accountability A wide range of case studies drawing on experiences of both public and private sector initiatives in Europe the United States Canada South America and Asia offer insightful analysis of the complex relationships between the state the market and civil society in the development of CSR accountability and sustainable development The book employs a multidisciplinary perspective in order to analyse the political social economic technological legal and organisational shaping of CSR The complexities underpinning the concept are thereby clearly drawn out and the gross oversimplifications inherent in the prevailing consultancy driven business case literature painfully exposed Above all the book offers a sound practically and theoretically informed contribution to public policy debate and reflects and builds on urgent calls from public and private sector policy makers as well as academics to develop better governance and accountability frameworks for business to deal with the imperatives of social responsibility sustainable development and ethics This book is divided into five parts In Part 1 the complex concepts of responsibility accountability and governance are discussed and in particular the presumed relationships between the state the market and civil society in improving accountability and governance are explored and critiqued Part 2 consists of chapters relating to corporate social responsibility and stakeholder theory Part 3 is concerned with empirical studies covering governance structures networking and corporate social responsibility Part 4 deals with corporate governance and its implications for regulators and civil society Part 5 discusses multinational companies and how

they impact on national governance regimes Finally a summary is provided with emerging international patterns of accountability and governance structures Corporate Social Responsibility Accountability and Governance will be essential reading for public and private policy makers and practitioners and academics interested in how CSR can become more than a soundbite and rather a substantial force for better global corporate governance and accountability Canadian Books in Print, 2003 *Alternatives Journal*, 2002 *Environment and Planning*, 2005 **Environment & Planning**, 2005-07
