## **Training Design In Aviation:**

Training Design in Aviation Norman MacLeod, 2017-03-02 Well structured training based on sound theoretical principles can transform the system in which high performance is essential and in turn the organisation. Yet the strategic role of cost effective training provision is often less well understood than it might be in all branches of aviation whether civil or regional general business or military. This book analyzes the cycle of training design from the identification of requirement through to measurement of effectiveness. Key issues in training design and management are illustrated with examples and learning is consolidated through case studies. The book provides advice, tools, procedures and examples of best practice both recent and well established to assist aviation training personnel who aim to guarantee cost effective training. The approach is highly practical but does not avoid covering the theory when needed. An informative guide to the process of training analysis and course design, the book examines each stage of the training design cycle in some depth. In addition it looks at the application of quality management and of project management to training design. Each chapter contains advice and techniques as well as examples drawn from the author's wealth of experience of training in aviation.

### **The Importance of Training Requirements Information in the Design and Use of Aviation Training Devices**

Wallace W. Prophet, GEORGE WASHINGTON UNIV ALEXANDRIA VA HUMAN RESOURCES RESEARCH OFFICE., 1966 It is believed that observance of the following guidelines can result in effective devices that allow increases in efficiency and economy in training as well as real increases in flight safety.

- 1 Training devices should be built only after careful analysis of the training requirements.
- 2 Analysis of training requirements should be primarily psychological rather than engineering in nature.
- 3 Determination of device characteristics should be oriented toward providing task fidelity with physical fidelity being provided only as necessary to task fidelity.
- 4 Synthetic training programs should receive as careful consideration in their development as do the trainers themselves.
- 5 Devices and synthetic training programs should be tested for training effectiveness just as aircraft are tested.
- 6 Training devices and simulators can provide an effective means of reinforcing infrequently occurring behaviors.

Author *e-Learning in Aviation* Suzanne Kearns, 2016-04-29 Whereas traditional classroom instruction requires pilots to be pulled off the line, a training facility to be maintained and instructors to be compensated, e learning is extremely cost effective and therefore an attractive alternative. However, e learning only saves money if the training is effective. Eager to reap financial benefits, e learning courses have a history of varying dramatically in quality. The poorest courses are those that directly convert classroom based presentations to an online format, not recognizing that computer based instruction is an entirely different medium. Addressing this issue directly, *e Learning in Aviation* explores the characteristics of computer based course design and multimedia that are associated with improved learning. It then provides guidance regarding how to use research based instructional design principles to plan, design, develop and implement an e Learning course within an aviation organization and continually evaluate whether or not the course is accomplishing instructional goals. A blended learning

strategy which incorporates both face to face and computer based instruction is suggested as the most appropriate choice for the majority of aviation companies The goal of this approach is to utilize e Learning as a tool to reduce time at the training centre and thereby increase pilot productivity and potentially improve the quality of training Although the examples within this book focus on pilot training the suggestions and guidelines are applicable to all employee groups within the industry
