Counselling introduces the theory and practice of TA which integrates cognitive behavioural and psychodynamic theories within a humanistic philosophy from a unique relational perspective. While most TA books focus on one field, this approach demonstrates the benefits of TA across a wide variety of helping settings: business and management, education and coaching, as well as counselling. Case studies from a variety of contexts bring TA to life for trainees in any of these disciplines, and the accessible, engaging writing style makes difficult concepts understandable for undergraduates and postgraduates alike. Bringing their book into the twenty-first century, expert authors Phil Lapworth and Charlotte Sills provide a brief history of TA, followed by individual chapters on the concepts and techniques used. Each chapter is devoted to one concept and includes a detailed definition and description, and suggestions for application in practice. Exercises for student, practitioner, and client, boxed summaries, diagrams, checklists, and sources of further reading make this the ideal text for use in training. This book is an essential companion for those embarking on specialist TA courses or studying TA as part of wider training, while those who want simply to integrate TA into their work with people can dip into it as suits their needs.

At the Interface of Transactional Analysis, Psychoanalysis, and Body Psychotherapy
William F. Cornell, 2018-08-15

At the Interface of Transactional Analysis, Psychoanalysis, and Body Psychotherapy revolves around two intertwined themes: that of the critique and expansion of the theory and practice of transactional analysis, and that of the generative richness discovered at the intersection of transactional analysis, psychoanalysis, and somatic psychotherapy. William F. Cornell explores the work of psychotherapists and counsellors through the lenses of clinical theory, practice, supervision, and ethics. The reader is thus invited into a more vivid experience of being engaged and touched by this work's often deep and at times difficult intimacy. The book is grounded in the approaches of contemporary transactional analysis and psychoanalysis, using detailed case discussions to convey the flesh of these professional and yet all too human working relationships. Attention is paid to the force and richness of the transference and countertransference tensions that pervade and enliven the therapeutic process. Unconscious processes

are viewed as fundamentally creative and life seeking with the vital functions of fantasy imagination and play brought into the foreground In the era of short term cognitive behavioural solution focused and evidence based models of counselling and psychotherapy At the Interface of Transactional Analysis Psychoanalysis and Body Psychotherapy seeks to demonstrate the power and creativity of longer term dynamically oriented work
