Wheaton,2011 The First Transcontinental Railroad originally called the Pacific Railroad was a railroad built in the United States between 1863 and 1869 that connected the western part of America with its eastern part Built by the Central Pacific Railroad of California and the Union Pacific Railroad it connected the Eastern terminus of Council Bluffs Iowa Omaha Nebraska with the railroad lines of the Pacific Ocean at Oakland California In time it would link in with the existing railway network present on the Eastern Coast of America thus connecting the Atlantic and Pacific coast of the United States for the first time by rail Because of this the line received a second nickname the Overland Route The railroad was a government operation authorized by Congress during the height of the Civil War Congress passed the Pacific Railroad Acts in 1862 and again in 1864 To pay for it the US government issued 30 year bonds as well as granting government land to contractors The construction of the line was a major achievement by both the Union Pacific constructing westward from Iowa and the Central Pacific constructing eastward from California The line was officially opened on May 10 1869 with the Last Spike driven through the railway at Promontory Summit Utah James K Wheaton looks at the history in this eBook **A Timeline History of the Transcontinental Railroad** Alison Behnke,2015-08 This book provides historical context on key events related to the construction of the American Transcontinental Railroad The timeline format offers a visual overview to accompany the text Provided by publisher *Nothing Like It In the World* Stephen E. The Transcontinental Railroad Charles River Editors, 2017-03-25. Includes pictures. Includes accounts written by newspapers, railroad workers and executives. Includes a bibliography for further reading. Includes a table of contents. The necessity that now exists for constructing lines of railroad and telegraphic communication between the Atlantic and Pacific coasts of this continent is no longer a question for argument; it is conceded by every one. In order to maintain our present position on the Pacific we must have some more speedy and direct means of intercourse than is at present afforded by the route through the possessions of a foreign power. 1856 report made by the Select Committee on the Pacific Railroad and Telegraph of the U.S. House of Representatives. The Transcontinental Railroad laid across the United States during the 1860s remains the very epitome of contradiction. On the one hand it was a triumph of engineering skills over thousands of miles of rough terrain but on the other hand it drained the natural resources in those places nearly dry. It civilized the American West by making it easier for women and children to travel there but it dispossessed Native American civilizations that had lived there for generations. It made the careers of many men and destroyed the lives of many others. It was bold and careless, ingenious and cruel, gentle and violent and it enriched some and bankrupted others. In short it was the best and worst of 19th century America in action. As settlers pushed west and the Gold Rush brought an influx of Americans to California the need for something like the Transcontinental Railroad was apparent to the government in the 1850s and with the help of private companies government officials conducted all kinds of land surveys in order to plot a course. Of course even once a route was chosen the backbreaking work itself had to be done to connect railroad lines across the span of nearly 2,000 miles. This required an incredible amount of manpower often consisting of unskilled laborers engaging in dangerous work and the financial resources poured into it were also extreme. J. O. Wilder, a Central Pacific Southern Pacific employee described a typical scene. The Chinese were as steady, hard working a set of men as could be found. With the exception of a few whites at the west end of Tunnel No. 6 the laboring force was entirely composed of Chinamen with white foremen and a boss translator. A single foreman often Irish with a gang of 30 to 40 Chinese men generally constituted the force at work at each end of a tunnel of these 12 to 15 men worked on the heading and the rest on the bottom removing blasted material. When a gang was small or the men were needed elsewhere the bottoms were worked with fewer men or stopped so as to keep the headings going. Ultimately the project was considered so important that work on it progressed throughout the Civil War and it took the better part of the 1860s before it was finally completed. Once the railroad was in place it proved a boon to building up the American West especially the Southwest and Pacific Northwest in places like Nevada, Utah, Wyoming, Colorado, Oregon and Washington. The Transcontinental Railroad chronicles the construction of the railroad that connected America's coasts. Along with pictures of important people, places and events you

will learn about the Transcontinental Railroad like never before in no time at all **The Transcontinental Railroad** Marilyn Miller,1986 Describes the construction of the Central Pacific Union Pacific and other related railroads which joined the east and west coasts by meeting at Promontory Point Utah and views both the early days of railroads preceding that event and the effects of the transcontinental railroad thus formed *The Transcontinental Railroad* Michael

Rajczak,1900-01-01 The transcontinental railroad didn't really cross North America In fact the famed rail building that took place in the 1860s only completed the stretch from Nebraska to California Readers will learn many new facts about the transcontinental railroad to augment what they learn in the social studies classroom Historical images drive home the reality of a 12 hour workday poor treatment of Chinese immigrant workers and the dangerous tunneling through the Sierra Nevada Fact boxes will further fascinate readers with one of the greatest industrial marvels of US history [A Great and Shining Road](#) John Hoyt Williams,1996-01-01 The Union Pacific and Central Pacific Railroads were officially joined on May 10 1869 at Promontory Point Utah with the driving of a golden spike This historic ceremony marked the completion of the first transcontinental railroad Spanning the Sierras and the Great American Desert the tracks connected San Francisco to Council Bluffs Iowa A Great and Shining Road is the exciting story of a mammoth feat that called forth entrepreneurial daring financial wizardry technological innovation political courage and chicanery and the heroism of thousands of laborers

Building the Transcontinental Railroad Jessica Rusick,2020-08 In mid 1860s two railroad companies had a huge job in front of them building the transcontinental railroad The railroad would run from east to west across the United States As the grueling work began there were many choices to make Now the choices are yours Would you rather blast rock to lay track in the Sierra Nevada mountain range or build bridges across raging rivers in the Great Plains Would you rather sleep in a cold mountain tunnel or in a camp infested with bedbugs and rats It s your turn to pick this or that
