Michael Anderson, Miranda Jefferson, 2018-11-29 In a world where current political climates and management cultures make risk aversion commonplace *Transforming Organizations* shows how all organizations including large and cumbersome institutions can transform to suit the needs of our rapidly evolving economic and social realities This book looks at how organizations and their leaders can adapt to an increasingly volatile and uncertain operating environment through the 4Cs Creativity Critical reflection Communication Collaboration Based on extensive research in the education organizational and business sectors Michael Anderson and Miranda Jefferson show how the 4Cs can be embedded embodied and enacted in many different types of organizations to make them more responsive to emerging challenges threats and opportunities *Transforming Organizations* highlights clear links between leading and learning because leadership is no longer if it ever was just a role for CEOs CFOs and senior managers For organizations to be flexible and agile in the 21st century all employees must have the opportunity to exercise leadership But this can only happen if deep learning is a standard feature of a leadership approach that actively and deliberately incorporates key 21st century skills the 4Cs themselves There is a substantial gap between companies knowing what they should do to be flexible creative and have clear channels of communication and how to make that a reality *Transforming Organizations* provides the evidence and inspiration necessary for doing business differently Written for those who have become disillusioned or frustrated with business practices that cannot meet the fast moving demands of the 21st century the book provides strategies and approaches developed from the authors work in real organizations in order to implement change and see organizations transform for the better

*Integrating Change* Mel Toomey, Judi Neal, 2021-09-26 Change processes in organizations are time consuming expensive and often don't create the intended results This book creates a new way for leaders to relate to change from a place of deeper understanding Based on years of research consulting and teaching the models and frameworks described in this book have been applied successfully in organizations such as Johnson Johnson AT T IBM Facebook Charles Schwab Company and Accenture The book provides breakthrough thinking to leaders who find themselves in the chaos of multiple high amplitude changes that cannot be managed from an autocratic or even a participative mindset The successful transformation of a human system does not require that people change who they are so much as it requires they become more of who they are more like themselves Change does not require new step by step models offered by an outside expert It requires teaching people how to become model builders As a result of this deeper transformation of mindset not only will people in the organization be able to manage the particular change crisis facing them in the moment they will develop a new relationship to change so that strategic thinking and breakthrough business outcomes become part of the organizational norm This book will primarily appeal to experienced leaders senior managers and change agents who have learned that the textbook recipes for initiating or responding to change don't work It is also useful supplementary reading for students of organizational studies and leadership
