Transparent Leadership Alan T. Belasen, PhD, Ariel R. Belasen, PhD, 2025-12-02 Establishing a culture of trust in organizations and strengthening the middle line are both critical for implementing innovation especially during major disruptions Work units and teams operate in environments that are largely influenced by broader organizational and institutional goals where middle managers are most needed for guiding and directing the staff to carry out change Recently however the value of middle managers has come under attack Despite their valuable contributions that often have gone unnoticed by senior executives middle managers have regularly been viewed as non value added practitioners who consume resources but do not add value to products or services Further as technology advances and social media allow executives to interact more directly with stakeholders it also removes middle management from the communication loops or the decision making process Conscious about the potential of being eliminated demoted or

bypassed some middle managers attempt to prove their premium by working excessively hard thus becoming hyper effective working longer hours with a desire to perform their roles better Surprisingly however executives who react harshly to these attitudes and behaviors also typecast middle managers as being unmotivated and needed to be further bypassed or often incentivized monetarily to accomplish important tasks Neglecting middle managers strengths or focusing on negative attributes and weaknesses creates conditions of failure harmful to employees and organizations

An Analysis](#) Sayed Ahmad Fahim Masoumi, 2021-03-23 Scientific Essay from the year 2021 in the subject Leadership and Human Resources Leadership grade 2 0 Rhine Waal University of Applied Sciences course Sustainable Development Management language English abstract Is leadership the critical driver in a transnational environment How to ensure an inclusive organizational culture for everyone Is gender equality a positive driver in diversity management How as a leader should we follow our communication What is there for us in using the technology for collaboration Is migration a need for developed countries Is there a need for training in a diverse working place This paper explores the requirements of leading in an international environment There is a significant need to manage the working place inclusively considering differences in values cultures viewpoints backgrounds and several other aspects This can happen only by wise smart

equipped and motivational leadership The leader requires the right communication channel with various skills to adapt quickly to the working environment and lead the employees In an international environment organizational culture can be a vital element because having staff members from different cultures sends the message that something that you may think is right can be wrong from an individual perspective It is better to know your employees fast and ensure that nothing will go wrong Globally women s involvement in the labor market can be beneficial as our worldwide economy can increase 160 trillion if we consider both males and females with equal access to the job market In a transnational collaboration and leadership communication can help convey the right information to the right audience in a unified and transparent way The failure to manage the data transfer in an office can weaken trust conflict dispute and other consequences The critical human capital in the global environment comes from immigration and the migrants have had potential contributions to the developed countries economic growth with their talents and expertise There is a projection of demand for 4 3 million workforces in the next decade and this demand can be achieved by skilling up our workforce conducting workshops training and short courses
