## **World Hypotheses:**

*World Hypotheses* Stephen Coburn Pepper, 1961 *Particulars and Universals in Clinical and Developmental Psychology*  
Meike Watzlawik, Alina Kriebel, Jaan Valsiner, 2015-12-01 This book explores what sparks a psychologist's interest in phenomena focusing on group vs individual perspectives in therapy and research. It highlights differences and commonalities in how information is filtered and expectations are formed, emphasizing the importance of communication and relationships.

**Experiential Learning** David A. Kolb, 2015 Experiential learning is a powerful and proven approach to teaching and learning that is based on one incontrovertible reality: people learn best through experience. Now in this extensively updated book, David A. Kolb offers a systematic and up-to-date statement of the theory of experiential learning and its modern applications to education, work, and adult development. *Experiential Learning: Second Edition* builds on the intellectual origins of experiential learning as defined by figures such as John Dewey, Kurt Lewin, Jean Piaget, and L. S. Vygotsky, while also reflecting three full decades of research and practice since the classic first edition. Kolb models the underlying structures of the learning process based on the latest insights in psychology, philosophy, and physiology. Building on his comprehensive structural model, he offers an exceptionally useful typology of individual learning styles and corresponding structures of knowledge in different academic disciplines and careers. Kolb also applies experiential learning to higher education and lifelong learning, especially with regard to adult education. This edition reviews recent applications and uses of experiential learning, updates Kolb's framework to address the current organizational and educational landscape, and features current examples of experiential learning both in the field and in the classroom. It will be an indispensable resource for everyone who wants to promote more effective learning in higher education, training, organizational development, lifelong learning environments, and online.

**Science, Worldviews and Education** Michael Matthews, 2009-07-14 This book has its origins in a special issue of the journal *Science Education*, Volume 18, Numbers 6-7, 2009. The essay by Costas Skordoulis, *Science and Worldviews in the Marxist Tradition*, did not appear in that special issue due to a mistake in production scheduling. It was published in an earlier issue of the journal, Volume 17, Number 6, 2008, but has been included in this book version of the special issue. As explained in the Introduction, the catalyst for the journal special issue was the essay on *Science, Worldviews and Education* submitted to the journal by Hugh G. Gauch Jr. This was circulated to the other contributors who were asked to write their own contribution in the light of the arguments and literature contained in the paper. Hugh made brief Responses and Clarifications after the papers were written. However, the Tanis Edis article on Islam and my own article on Priestley were processed too late to benefit from Hugh's appraisal. The journal is associated with the International History, Philosophy and Science Teaching Group, which was formed in 1987. The group stages biennial international conferences and occasional regional conferences; details can be found at [www.ihpst.org](http://www.ihpst.org). The group, through the journal, conferences, and its electronic newsletter at [www.ihpst.org](http://www.ihpst.org).

**A Contextualistic Worldview** Lewis Edwin Hahn, 2001 This selection of articles by Lewis E

Hahn addresses the philosophical school of contextualism and four contemporary American philosophers John Dewey Henry Nelson Wieman Stephen C Pepper and Brand Blanshard Stressing the relatively recent contextualistic worldview which he considers one of the best world hypotheses Hahn seeks to achieve a broad perspective within which all things may be given their due place After providing a brief outline Hahn explains contextualism in relation to other philosophies In his opening chapter as in later chapters he expresses contextualism as a form of pragmatic naturalism In spite of Hahn s high regard for contextualism however he does not think it would be good if we were limited to a single worldview The more different views we have and the more different sources of possible light we have the better our chances that some of these cosmic maps will shed light on our world and our place in it

**The Act in Context** Steven C. Hayes,2015-10-16 The Canonical Papers of Steven C Hayes is a compilation of his most pivotal articles written from 1982 2012 Through these selected papers Hayes again revisits the theoretical struggles between behavioral and cognitive behavior theories taking us from the 1980s into present day discussing the breakthroughs and follies Using this as a focus point he discusses the tradition of behavior analysis and its difficulties in addressing human language and cognition Moving forward into the 90s he chronicles the changes in a behavioral approach that emerge from a contextual perspective on human cognition and lays out the foundation for a contextual behavioral science approach that he argues is more likely to lead to an understanding of human action and an alleviation of human suffering Although the articles have previously been published they have been edited and compiled ensure this branch of research is clear to the modern audience The compilation was chosen by Dr Hayes to enhance his vision for a functional contextual approach to complex human behavior
