World in Transition Wissenschaftlicher Beirat der Bundesregierung Globale Umweltveränderungen (Germany), 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company **World in Transition 4** German Advisory Council On Global Change (Wbgu), 2013-09-13 At the start of the 21st century fighting poverty and protecting the environment are two of the most urgent challenges facing the international community Environmental changes will jeopardize people's survival to an even greater extent in the future and will hit the poor hardest To meet these challenges it will be essential to breathe new life into the partnership between industrialized and developing countries It will be equally essential to combine poverty reduction with environmental protection in an integrated policy structure spanning all levels from local to global In this report the German Advisory Council on Global Change WBGU shows that global environmental policy is a prerequisite for global poverty reduction WBGU analyses the relevant policy processes and delivers recommendations charting the way forward With its interdisciplinary approach providing a complex and systematic analysis of the poverty environment nexus WBGU's latest report breaks new ground Indira Gandhi's old convenient maxim was Poverty is the biggest polluter Put forward at the 1972 UN Conference on the Human Environment in Stockholm it has been sorely misused ever since to override environmental precaution and prioritize economic development strategies instead The new WBGU report maps out a way to shape a coherent environment and development policy This report revitalizes the Rio spirit and gives it a robust scientific base Prof Dr Ernst Ulrich von Weizsäcker Member of the German Bundestag MdB

World in Transition: Fighting Poverty Through Environmental Policy, 2004 *Global Environmental Governance and Desertification* Dr. A. Kannan, 2012 *Climate Change as a Security Risk* Hans Joachim Schellnhuber, 2010-09-23 Without resolute counteraction climate change will overstress many societies' adaptive capacities within the coming decades This could result in destabilization and violence jeopardizing national and international security to a new degree However climate change could also unite the international community This is provided that we recognize climate change as a threat to humankind and so set the course for adopting a dynamic and globally coordinated climate policy If we fail to do so climate change will draw ever deeper lines of division and conflict in international relations triggering numerous conflicts between and within countries over the distribution of resources especially water and land and over the management of migration or over compensation payments between the countries mainly responsible for climate change and those countries most affected by its destructive effects With *Climate Change as a Security Risk* WBGU has compiled a flagship report on an issue that quite rightly is rising rapidly up the international political agenda The authors pull no punches on the likelihood of increasing tensions and conflicts in a climatically constrained world and spotlight places where possible conflicts may flare up in the 21st century unless climate change is checked The report makes it clear that climate policy is preventative security policy
