Spatial Multimedia And Virtual Reality:

Spatial Multimedia and Virtual Reality Antonio S. Camara, Jonathan Raper, 1999-06-17 The intersection of two disciplines and technologies which have become mature academic research topics in the 1990s was destined to be a dynamic area for collaboration and publication However until now no significant book length treatment of the meeting of GIS and Virtual Reality has been available This volume puts that situation to rights by bringing these together to cement some common understanding and principles in a potentially highly promising area for technological collaboration and cross fertilisation The result is a volume which ranges in subject matter from studies of a Virtual GIS Room to Spatial Agents and from an Environmental Multimedia System to Computer Assisted 3D Geographic Education All the contributors are well known international scientists principally from the computational side of GIS It will be a valuable resource for any GIS researcher or professional looking to understand the leading edge of this fertile field

Multidimensional Geographic Information Science Jonathan Raper, 2000-11-23 The way people normally view a GIS is 2 dimensional a greatly limiting form However as developments occur within the field researchers and practitioners are finding ways to make a GIS 3 dimensional and in some instances even 4 dimensional Being able to view a GIS in more than 2 dimensions greatly enhances its usability This forward looking text looks at the ways in which 3 and 4 dimensional multidimensional GIS can be incorporated into the area in the future using a variety of programming techniques The author of this unique book also discusses current examples and uses of multidimensional GIS in the field and shows the way forward for users in the coming years

Virtual Reality in Geography Peter Fisher, David Unwin, 2001-11-22 Virtual Reality in Geography covers through the window VR systems fully immersive VR systems and hybrids of the two types The authors examine the Virtual Reality Modeling Language approach and explore its deficiencies when applied to real geographic environments This is a totally unique book covers all the major uses and methods of virtual reality used by geographers The authors have produced a CDROM that comes with the book of virtual reality images that will be a fascinating companion to the text This book will be of great interest to geographers computer scientists and all those interested in multimedia and computer graphics

Multimedia and Virtual Reality Engineering Richard Brice, 1997-10-17 This is the complete practical introduction to virtual reality and multimedia for those wishing to build systems It covers the foundations and engineering needed to design and construct projects incorporating video audio and textural elements and including the use of the latest hardware to create an artificial world for education information or entertainment Production and authoring platforms are described computer animation and hypertext are covered but those looking for pages of software listings and computerspeak will be disappointed This book is about the nuts and bolts sound and video cards head mounted displays CrystalEyes glasses other 3D glasses for entertainment audio and video production and realistic auditory and visual stimulation including stereoscopy The creation of Cyberspace and strategies to achieve a complete Cyberatmosphere are presented Three dimensional sound generation and

video techniques that have never previously been published are revealed This is the handbook for anyone working in the industry or hoping to enter it It also provides a guide for those hoping to cross fertilise the industry coming from audio video computing or engineering backgrounds A complete technical guide to MM and VR Includes a Hypertext edition of the book with added audio and graphics on CD Hardware software video and never before published 3D audio techniques covered
