Thyroid Autoimmunity:

Thyroid Autoimmunity A. Pinchera, 2012-12-06 In 1956 three groups independently reported evidence that some thyroid disease appearing spontaneously in humans or experimentally induced in animals are related to autoimmune processes The interval between these landmark discoveries and the present has witnessed a remarkable and continuing growth of both knowledge and concepts concerning the mechanisms of immune regulation the pathogenesis of autoimmune thyroid diseases and their clinical and laboratory manifestations More importantly knowledge of thyroid autoimmunity has in many respects comprised the vanguard of an ever increasing appreciation and understanding of autoimmune diseases in general On November 24-26 1986 an International Symposium on Thyroid Autoimmunity was held in Pisa Its purpose was to commemorate the birth of thyroid autoimmunity as a scientific discipline to summarize current knowledge and concepts in this area and where possible to anticipate areas of opportunity for the future hence the theme of the Symposium Memories and Perspectives To open the meeting the Magnifico Rettore Chancellor of the University of Pisa granted special Awards to Dr Deborah Doniach Dr Ivan Roitt and Dr Noel R Rose who published the first fundamental studies in the field of thyroid autoimmunity and to Dr Duncan G Adams whose discovery of the long acting thyroid stimulator LATS opened the door to our current understanding of the pathogenesis of Graves disease During the meeting thirty plenary lectures were presented

The Association of Other Autoimmune Diseases in Patients With Thyroid Autoimmunity Alessandro Antonelli, Salvatore Benvenga, 2018-11-02 Autoimmune thyroid diseases AITD are T cell mediated organ specific autoimmune disorders resulting from an immune dysregulation leading to a thyroid immune attack Antonelli and Benvenga Graves disease and Hashimoto's thyroiditis are the two main clinical presentations of AITD and their clinical hallmarks are thyrotoxicosis and hypothyroidism respectively In many cases AITD may be associated in the same patient with other organ specific autoimmune attacks such as in the case of type II autoimmune polyglandular syndrome or type I diabetes etc Furthermore AITD and thyroid function abnormalities have been frequently described in patients with systemic rheumatologic autoimmune diseases Conversely patients affected with the above mentioned autoimmune disorders are more frequently affected by AITD In this Research Topic constituted by nineteen papers we review and discuss new evidence about the association of other autoimmune diseases in patients with AITD Among other organ specific autoimmune disorders the associations of AITD with chronic autoimmune gastritis Cellini et al vitiligo Baldini E et al lichen Guarnieri et al psoriasis Ruffilli et al myasthenia gravis Lopomo and Berrih Akinin and glomerulopathies Santoro et al have been treated Also the associations of AITD in systemic autoimmune diseases have been treated as Sjogren's syndrome Baldini C et al systemic sclerosis Fallahi et al systemic lupus erythematosus Ferrari et al Antiphospholipid syndrome Versini sarcoidosis Fazzi et al the autoimmune inflammatory syndrome induced by adjuvants Watad et al rheumatoid arthritis Bliddal et al Hepatitis C Virus and mixed cryoglobulinemia Ferri et al and psoriathic arthritis Ruffilli et al Furthermore peculiar aspects associated with

post partum thyroiditis have been reviewed too Di Bari et al Le Donne et al The exact pathogenetic mechanisms underlying the above reported associations are not completely known It has been hypothesized that the influence of genetic Copped and environmental factors Antonelli and Benvenga could lead to the onset of autoimmune phenomena in different organs in the same subject characterized by predominance of a Th1 immune pattern at the beginning and in the active phase of these disorders In conclusion an association of other autoimmune diseases in patients with thyroid autoimmunity has been shown and this Research Topic provides an extensive update of the literature and suggests interesting points for new investigations
