Train The Trainer Workbook:

Train The Trainer Workbook Richard Heller Mba, John N Kalaras, PH D, 2020-04-29 The Train the Trainer Workbook is a guide that helps new and experienced trainers deliver training for best results It links with the Train the Trainer Manual listing all the how to s and why s involved in creating and presenting world class training presentations The workbook parallels the five sections in the Train the Trainer Manual and is a beneficial complement to the manual Each section provides the reader with tools sets linking benefits to the presentation The reader is encouraged to use the Workbook throughout the entire development of the training program The first section includes tools for conducting the training needs analysis linking any training to the organizational goals and objectives The authors insist that any training must address both new hires and seasoned employees with measurable results that provide real advantages to the organization Unlike many training systems this system links training organizational returns The philosophy of the authors is that without clear organizational benefits training is an unproductive entertainment Section two addresses implementation and introduces new tools to create influential training It includes a 17 step template that allows the user to create an effective training program whether it is a single presentation or a multi session presentation The exercises include addressing real world problems demanding solutions The user isn t left empty handed but is provided with suggested tools to understand and address the problems Section three includes twenty specific training techniques to capture the interest of the participants engage them with the trainer and other participants and utilize their experience to integrate the training into future behaviors Mental engagement is the ultimate goal of all training These tools provide new trainers with years of experience and experienced trainers with insights into approaches that will solve many of their training frustrations Section four covers the attributes of inspirational trainers The Workbook identifies the best and most effective training techniques It includes a list of 48 traits our trainers have used and that their attendees have liked the most However this section is not simply a list of tools but discusses how to incorporate them into any training program Section 5 argues that training is less an art than it is a science And any science includes testing to separate the truth from the fiction In Section 5 the authors include twenty two graphs and chart techniques trainers can select and use to monitor and improve their programs These tools are useful by both the trainer and the trainees to measure progress chart successes and help with continual improvement and success In conclusion you should remember that Training is a learnable skill Practice with the tools we have given you apply them and improve your approach Our goal is to make you an effective trainer while helping your organization reinvent itself remain relevant and become more profitable Remember THIS IS A GUIDE FOR THE BEGINNER AND A REFERENCE FOR THE PROFESSIONAL

we need to have some new technology open to us to compete After over 22 years of training trainers I ve collected all my thoughts tips and techniques and combined them into this workbook which will accelerate your learning on the noble art of corporate training Training-the-trainer Jonathan C. Warner,Von Varnik,Training Solutions Group Pty. Ltd,1998 **The ASTD Reference Guide to Professional Training Roles & Competencies** Henry J. Sredl,1987 **Train the Trainer for Sales and Customer Service** Jack Manning,2013-10 Jack Manning Associates has been in business since 1988 Mr Manning worked for Verizon for 28 years and as a consultant for 8 years writing many of their Sales and Customer Service courses What makes Jack Manning Associates different from other trainers is their psychological approval to Customer Service For example all trainers teach the skills such as asking open questions paraphrasing asking specific questions etc but we show the participants how to recognize why they are asking certain questions in order to control the call and bring the contact to a successful conclusion We impress on trainers to direct their customers to a satisfactory conclusion Psychological approach shortens the call increases sales and most importantly leads to happy customers For example voice tone is so important since it convinces the customer that the representative will do what they say or causes doubt which makes the customer call back to check on the order This is a waste of time for the representative and an inconvenience and possible loss of the customer Representatives are taught to use a forceful reassuring voice tone rather than a doubtful do not care attitude Paraphrasing not only reinforces the customer that you are listening but assures them you will deliver on time thus shortening the call time Studies show that up to 40% of customers call back since they were unconvinced that the representative would do what they promised Trainers are provided with a 30 page trainer s guide On the left page are trainer notes that correspond to the participant workbook page on the right Basically this makes the trainer more professional able to answer any question and appear to be confident Trainers are taught to greet participants by name as they enter the room This puts the trainer and the participant at ease which is most important Trainers are encouraged to explain the objectives of the course and that they will have fun while learning We cover the four personality social styles which is the key to success This is a fun and important exercise which relaxes participants and trainers When we announce that role plays will be conducted participants usually cringe We explain that each person has their own personality and no one will be thrown under the bus since people handle situations differently For example some people are aggressive while others are passive but each can be successful When role plays are done properly the after class evaluations show a need for more role plays We customize the course by using the day to day contacts of the participants Handling difficult callers is a vital skill where we offer a step by step psychological approach to calming the customer and turning this into a successful contact Trainers are taught to keep the seminar upbeat and interesting with an interactive approach that keeps the participants involved Jack Manning will conduct the first half day of training The remainder of the two or three day class is devoted to trainers conducting parts of the seminar with critique and advice by Jack Manning Rates Two day seminar up to four people 3495 Three day seminar up to ten people 4995 Each

trainer receives a work book and Jack Manning will remain on call via telephone to consult and answer trainer questions for one year at no charge Jack Manning 610 449 2389 E mail havjack verizon net Technical & Skills Training ,1993 *Books and Pamphlets, Including Serials and Contributions to Periodicals* Library of Congress.
