Transformational Acting

**Jeffrey Howard Huberman, Brant L.
Pope, James Ludwig**

Transformational Acting:

Transformational Acting Sande Shurin, 2002 Limelight Sande Shurin's enlightened acting technique is a determined effort to steer away from intellectual theory based instruction to a more creative and viscerally human approach. It moves beyond teaching how to represent a character or various emotions toward living a role with in the moment identification and urgency. Asserts Rapp of Rent fame. Since I started working with Sande I think it's safe to say my work on character and my ability to transform into character have exploded and expanded beyond anything I previously would have imagined. **From Acting to Performance** Philip Auslander, 2002-04-12 From Acting to Performance collects for the first time major essays by performance theorist and critic Philip Auslander. Together these essays provide a survey of the changes in acting and performance during the crucial transition from the ecstatic theatre of the 1960s to the ironic postmodernism of the 1980s. Auslander examines performance genres ranging from theatre and dance to performance art and stand up comedy. In doing so he discusses an impressive line up of practitioners including Antonin Artaud Jerzy Grotowski Peter Brook Willem Dafoe the Wooster Group Augusto Boal Kate Bornstein and Orlan. From Acting to Performance is a must for all students and scholars interested in contemporary theatre and performance. **Embodied Acting** Rick Kemp, 2012 A focus on the body its actions and its cognitive mechanisms identifies foundational principles of activity that link the three elements of theatre Story Space and Time. The three meet in are defined by and expressed through the actor's body from the Introduction. Embodied Acting is an essential pragmatic intervention in the study of how recent discoveries within cognitive science can and should be applied to performance. For too long a conceptual separation of mind and body has dominated actor training in the West. Cognitive science has shown this binary to be illusory shattering the traditional boundaries between mind and body reason and emotion knowledge and imagination. This revolutionary new volume explores the impact that a more holistic approach to the bodymind can have on the acting process. Drawing on his experience as an actor director and scholar Rick Kemp interrogates the key cognitive activities involved in performance including non verbal communication the relationship between thought speech and gesture the relationship between self and character empathy imagination and emotion. New perspectives on the work of Stanislavski Michael Chekhov and Jacques Lecoq as well as contemporary practitioners including Daniel Day Lewis and Katie Mitchell are explored through practical exercises and accessible explanations. Blending theory practice and cutting edge neuroscience Kemp presents a radical re-examination of the unconscious activities engaged in creating and presenting a role. The Roots of Theatre Eli Rozik, 2005-04 The topic of the origins of theatre is one of the most controversial in theatre studies with a long history of heated discussions and strongly held positions. In The Roots of Theatre Eli Rozik enters the debate in a feisty way offering not just another challenge to those who place theatre's origins in ritual and religion but also an alternative theory of roots based on the cultural and psychological conditions that made the advent of theatre possible. Rozik grounds his study in a comprehensive review and criticism of each of the leading historical and

anthropological theories He believes that the quest for origins is essentially misleading because it does not provide any significant insight for our understanding of theatre Instead he argues that theatre like music or dance is a sui generis kind of human creativity a form of thinking and communication whose roots lie in the spontaneous image making faculty of the human psyche Rozik s broad approach to research lies within the boundaries of structuralism and semiotics but he also utilizes additional disciplines such as psychoanalysis neurology sociology play and game theory science of religion mythology poetics philosophy of language and linguistics In seeking the roots of theatre what he ultimately defines is something substantial about the nature of creative thought a rudimentary system of imagistic thinking and communication that lies in the set of biological primitive and infantile phenomena such as daydreaming imaginative play children s drawing imitation mockery caricature parody storytelling and mythmaking

The Actor and the Character Vladimir Mirodan,2018-11-12
