Solomon,2013-09-05 This volume contains a collection of papers written by former students postdoctoral fellows and colleagues of Richard Thompson and represent written versions of papers presented at the Festschrift symposium The Festschrift provided an excellent opportunity for the participants to recount their memories and experiences of working with one of the leading figures in behavioral neuroscience and to place their current research in the context of earlier research conducted in the Thompson laboratory As a Festschrift volume the various chapters contain numerous and sometimes very personal references to Richard Thompson s influence on the careers of the authors as well as summaries of past and present work being conducted in the authors laboratories Part I includes studies of spinal cord plasticity and the involvement of the hippocampus and related structure in classical eyeblink conditioning Part II explores the critical role of the cerebellum and associated areas in classical eyeblink conditioning Part III focuses on a continued exploration of the involvement of the cerebellum in classical eyeblink conditioning using standard procedures as well as innovative molecular biology and genetic techniques It also includes studies aimed at delineating modulatory influences on learning such as stress and hormonal factors The incredible influence that Richard Thompson has had on the fields of experimental psychology and neuroscience should be evident on reading the contributions made by the various authors to this volume The research conducted in Thompson s laboratory over the years has been cutting edge comprehensive and influential Therefore this volume is dedicated to Richard F Thompson a productive innovative scientist and outstanding mentor *The Law Reports of the Incorporated Council of Law Reporting* Great Britain. High Court of Justice. Chancery Division,1906 Sentience, Pain, and Anesthesia in Advanced Invertebrates William Winlow,Anna Di Cosmo,2019-11-04 There is an emerging view supported by animal welfare legislation in a number of countries that some advanced invertebrates are self aware sentient beings with the ability to feel pain Sentience must encompass elements of time and neural complexity including memory and learning which leads us to ask At what convergent point in the evolution of nervous systems does the subjective sensation of pain arise Here we start to grapple with this issue particularly with regard to arthropods and cephalopod molluscs and to consider the most appropriate ways of anesthetizing them to minimize pain wherever possible We also report on the development of cell culture techniques to understand the actions of the anesthetics

being used A better understanding of sentient creatures other than ourselves may eventually assist future development of artificial intelligence particularly if we are able to perceive whatever common neural features underlie sentience in those animals that possess it
