Hawaii Farm Science, 1972

Sorghum Biology Klaus Ammann, 2010-11-16 Sorghum is Africa s contribution to the world s top crops and belongs to the elite handful of plants that collectively provide more than 85 percent of all human energy Today it is the dietary staple of more than 500 million people in more than 30 countries Only rice wheat maize and potatoes surpass it in feeding the human race Nevertheless Sorghum receives merely a fraction of the attention it warrants and produces merely a fraction of what it could A growing number of researchers already see that a new and enlightened

Sorghum era is just around the corner. Accorded research support at a level comparable to that devoted worldwide to wheat or rice or maize, Sorghum could contribute a great deal more to food supplies than it does at present. And it would contribute most to those regions and peoples in greatest need. The book presented should help to synthesize the literature and achievements in the research on the biology of Sorghum in the wake of the 21st century. *Top 100 Food Plants* Ernest Small, 2009. This beautifully illustrated book reviews scientific and technological information about the world's major food plants and their culinary uses. An introductory chapter discusses nutritional and other fundamental scientific aspects of plant foods. The 100 main chapters deal with a particular species or group of species. All categories of food plants are covered including cereals, oilseeds, fruits, nuts, vegetables, legumes, herbs, spices, beverage plants, and sources of industrial food extracts. Information is provided on scientific and common names, appearance, history, economic and social importance, food uses including practical information on storage and preparation as well as notable curiosities. There are more than 3000 literature citations in the book and the text is complemented by over 250 exquisitely drawn illustrations. Given the current alarming rise in food costs and increasing risk of hunger in many regions, specialists in diverse fields will find this reference work to be especially useful. As well, those familiar with Dr. Small's books or those with an interest in gardening, cooking, and human health in relation to diet will want to own a copy of this book. Publisher's web site: **HORIZON OF FIELD CROPS** Ratikanta Maiti, 2017-08-14. The colossal importance of various field crops to satisfy hunger and other requirements of human beings is well known. The roles of cereals and pulses on human nutrition deserves special emphasis for billions of human populations in the world. The present book's brief accounts of various aspects of important cereal crops, sugarcane, various legumes, oil seed crops, and fiber yielding crops of the world in different chapters with illustrations. It deals with origin and domestication, systematic positions, utilization, botanical description, vegetative and reproductive growth, physiology, mineral nutrition, productivity, and abiotic stress resistance of most of the crops and also discusses the mechanism of tolerance to drought and salinity. The book also deals with various aspects of fiber crops. In the last two chapters, researches undertaken on salinity tolerance of few crops are discussed. Therefore, the book deals in brief with the major aspects of most of the field crops in the world. Not a single book is available in the market dealing with so many aspects all together. The book can serve as a textbook in economic botany, agriculture, and serve the needs of researchers working on various crops with research advances obtained on these crops. **Sorghum** Manuel Vázquez, 2012. There is a world wide trend for the sustainability of cultures and the optimal production of food and a source of renewable energy. The culture of sorghum links these two concerns. This book reviews new applications of sorghum based on genetics and biotechnology. This book also covers an overview of the new biotechnological process of sorghum, exploring the new applications as additives and energy sources. This book is a blend of the most up to date techniques useful in post harvest quality and safety of fruit production. *The Proceedings of the Iowa Academy of Science* Iowa Academy of Science, 1897.
