that pupils cannot reasonably be expected to determine all of the lines by constructions already mastered If attracted by the beauty of the copy the pupil is allowed to present a result that will not bear detailed geometrical analysis entertainment has been substituted for education A design which is not an easily recognized application of a known construction is certainly of doubtful value Many of the designs in this book are very simple A few are complicated but even these can be so broken up that only the simple part need be given to the class While it must remain true that for training in clear thinking and accurate expression nothing in the teaching of geometry can take the place of abstract originals and of formal proof of theorems nevertheless exercises of the type here given have a unique and important place About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [A Source Book of Problems for Geometry, Based Upon Industrial Design and Architectural Ornament](#) Sykes Mabel 1868-,2013-01 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy **ENC Focus** ,1997 [Problem-solving Experiences in Geometry: Blackline masters](#) Randall I.
