Recentering the Self Michael Washburn presents a new account of the ego ego development and the role of the ego in spiritual life He starts by tracing the premodern antecedents of the notion of the ego in Greek philosophy and Christian theology and then explains the seventeenth century emergence of the notion in Descartes s radically new account of the soul s relation to the body Reviewing subsequent criticisms of the notion the author formulates a revised conception of the ego that highlights the ego s inherently two sided nature as a subject and agency that although rooted within interior consciousness lives originally and primarily in the material social world Washburn uses this revised conception of the ego to explain how the two sides of the ego develop in concert over major stages of the human lifespan and why the ego despite widespread belief to the contrary plays primarily a positive role in spiritual life Recentering the Self makes important contributions to the history of philosophy consciousness studies phenomenology developmental psychology and spiritual or transpersonal psychology **Reconciling Places** Paul A.
