Theorizing the State Geographically

STATE SOVEREIGNTY AS SOCIAL CONSTRUCT

- Westphalian sovereignty (states exercising ultimate control over territory) no more than an ideal. Does not capture 'actual spatiality of power' (p. 96)
- Limited number of works in Political Geography with a focus on state sovereignty: Agnew and Corbridge (1995), Murphy (1996, 1999), O'Tuathail et al. (1998), Dalby (2002), Kofman (2002), Mountz (2004), Agnew (2004), Marston (2003), Glassman (1999), Sidaway (2002), Newman (2001), Anderson (1996), Agnew (1999), O'Tuathail (2000)
- Focus in 'state as a bureaucracy' rather than in 'states as territorial polities endowed with popular sovereignty' or how the state is constituted or takes on meaning (p. 96)

The God Who Deconstructs

Himself Nick Mansfield, 2010-08-02 No topic has caused more discussion in recent philosophy and political theory than sovereignty. From late Foucault to Agamben and from Guantanamo Bay to the war on terror, the issue of the extent and the nature of the sovereign has given theoretical debates their currency and urgency. New thinking on sovereignty has always imagined the styles of human selfhood that each regime involves. Each denomination of sovereignty requires a specific mode of subjectivity to explain its meaning and facilitate its operation. The aim of this book is to help outline Jacques Derrida's thinking on sovereignty, a theme which increasingly attracted Derrida towards the end of his career in its relationship to subjectivity. It investigates the late work *Rogues: Two Essays on Reason* as not only Derrida's fullest statement of his thinking on sovereignty but also as the destination of his career-long interest in questions of politics and self-identity. The book argues that in Derrida's thinking of the relationship between sovereignty and subjectivity and the related themes of unconditionality and ipseity, we can detect the outline of Bataille's adaptation of Freud. Freud completed his metapsychology by defining the economic nature of subjectivity. In Bataille's hands, this economic theory became a key to the nature of inter-relationship in general, specifically the complex and shifting relationship between subjectivity and power. In playing with Bataille's legacy, Derrida connects not only with the irrepressibly outrageous thinking of philosophy's most self-consciously transgressive thinker but with the early twentieth-century scientific revolution through which energy became ontology. As with so many of the forebears who influenced him, Derrida echoes and adapts Bataille's thinking while radically de-literalising it. The results are crucial for understanding Derrida's views on power, subjectivity and representation, as well as all of the other key themes in late Derrida: hospitality, justice, otherness and the gift.

Constructing Sovereignty Between Politics and Law Tanja E. Aalberts, 2012

This book explores the interplay between sovereignty, politics and law through different conceptualizations of sovereignty. Despite developments such as European integration, globalization and state failure, sovereignty proves to be a resilient institution in contemporary international politics. This book investigates both the continuity and change of sovereignty through an

examination of the different ways it is understood sovereignty as an institution as identity as a language game and as subjectivity In this illuminating book Aalberts examines sovereign statehood as a political legal concept an institutional product of modern international society and seeks an interdisciplinary approach that combines international relations and international law This book traces the consequences of this origin for the conceptualization of sovereign statehood in modern academic discourse drawing on key jurisprudence and international treaties and provides a new framework to consider the international significance of sovereignty As an innovative approach to a critical institution **Constructing Sovereignty between Politics and Law** will be of interest to students and scholars of international relations international relations theory and international law
