Landscapes of a New Cultural Economy of Space Theano S. Terkenli, Anne-Marie d'Hauterterre, 2006-03-09 The purpose of the book is to tie together various perspectives, insights, and constructions pertaining to contemporary landscapes and landscape representations from different theoretical and methodological positions as well as from diverse geographical and historical contexts in order to elucidate and illustrate processes of cultural transformation inscribed in space. The unifying theme as well as the main goal and prospective contribution then lies in the exploration of these developing forces and characteristics of the new cultural economy of space in the contemporary landscape. The primary objective of bringing together geographical perspectives from various interdisciplinary fields is to examine and discuss ways in which the complexities of this newly emerging cultural economy of space are applied on various sorts of landscapes: i.e. urban and rural landscapes, landscapes of everyday life, landscapes of tourism and recreation, postcolonial and hybrid landscapes, landscapes of economic production, landscapes of the street and of public life, national landscapes, and so on. The overarching question thus is: how do these processes work in different geographical contexts and contribute to place and landscape creation

[Asian Ethical Urbanism: A Radical Postmodern Perspective](#) William Siew Wai Lim, 2005-07-15 With the impending demise of modernist planning, the footprints and corpses of failed modernist visions are littered everywhere. A vacuum of implementable urban theories has occurred at the time when unprecedented expansion and restructuring of cities in rapidly developing economies are taking place. In this collection of essays, William S. W. Lim zeroes in on the peculiarities and dynamics of present Asian urban and architectural conditions in order to challenge and transcend the socio-ecological forms and political influences generated by the current system of global capitalism. Part I of this book consists of the main essay which attempts to establish baselines for an effective formulation of ethical urbanism in Asia by clarifying issues that have previously been unquestioningly bound up with Western values and discourses. As an architect-urbanist, Lim lends a determinedly spatialist and environmental perspective to issues such as rights, ethics, happiness, and social justice while compelling his readers to rethink previously established notions about them. Part II of this book consists of three city studies on Hanoi, Shanghai, and Singapore, completed in the last two years, which attempt to match Lim's theoretical formulation with actual conditions occurring in Asia today. Also included is *Asian Architecture in the New Millennium*, a fascinating discourse on contemporary design conducted from a postmodern perspective
