Smith, 1976 *GIS in Spatial Population Analysis and Regional Economic Development* Hui Lin, 1998 Population Dynamics and Projection Methods John Stillwell, Martin Clarke, 2011-02-15

Although the human population growth rate of the world has been declining since peaking in the early 1960s the populations of individual countries are changing at different rates Population dynamics at national level are partly determined by levels of fertility and mortality but the impact of international migration is playing an increasingly important role Moreover internal migration plays a major part in population change at the sub national level This fourth volume in the series *Understanding Population Trends and Processes* is a celebration of the work of Professor Philip Rees It contains chapters by contributors who have collaborated with Phil Rees on research or consultancy projects or as postgraduate students Several chapters demonstrate the technical nature of population projection modelling and simulation methods while others illustrate issues relating to data availability and estimation This book demonstrates the application of theoretical and modelling methods and addresses key issues relating to contemporary demographic patterns and trends **Population Geography: Progress & Prospect (Routledge Revivals)** Michael Pacione, 2013-10-14
