You'll follow the development of sequential art storytelling from caveman wall paintings to modern manga and cinematic techniques. Here you will explore comics in all forms: those flimsy pamphlets we call comic books, thick graphic novels, Japanese manga, and blockbuster movies featuring epic battles between good and evil. But behind it all, you'll discover how comics are an intellectual property business, the real money found in licensed bedsheets and fast food merchandise, heart-pounding theme park rides, and collectible toys, video games, and Hollywood extravaganza featuring such popular superheroes as Spider-Man, Superman, X-Men, and Batman.

Author John Lent has used all manner of methods to gather the citations: searching library and online databases, contacting scholars and other professionals attending conferences and festivals, and scanning hundreds of periodicals. He has gone to great length to categorize the citations in an easy-to-use scholarly fashion, and in the process has helped to establish the field of comic art as an important part of social science and humanities research. The ten volumes in this series, covering all regions of the world, constitute the largest printed bibliography of comic art in the world and serve as the beacon guiding the burgeoning fields of animation, comics, and cartooning. They are the definitive works on comic art research and are exhaustive in their inclusiveness, covering all types of publications: academic, trade, popular, fan, etc. from all over the world. Also included in these books are citations to systematically researched academic exercises, as well as more ephemeral sources such as fanzines, press articles, and fugitive materials, conference papers, unpublished documents, etc., attesting to Lent's belief that all pieces of information are vital in a new field of study such as comic art.
