Innovations in Global Mental Health Samuel O. Okpaku, 2021-11-02 Over the course of the last decade political and mental entities at large have embraced global mental health the idea that psychiatric health is vital to improved quality of life Physicians globally have implemented guidelines recommended by the National Institute of Mental Health NIMH in 2007 thereby breaking down barriers to care and improving quality of life in areas where these practices have been implemented Programs for training and education have expanded as a result Clinicians benefit more from both local resources in some regions as well as in international collaboration and technological advancements Even amidst all of these positive outcomes clinicians still face some stumbling blocks With worldwide statistics estimating that 450 million people struggle with mental neuropsychiatric and neurological disorders 25 percent of the world's non-communicable disease burden rising to these challenges prove to be no small feat even in wealthy Western nations Various articles and books have been published on global mental health but few of them thoroughly cover the clinical research innovative and social implications as they pertain to psychiatry often only one of these aspects is covered A comprehensive text that can keep pace with the rapidly evolving literature grows more and more valuable each day as clinicians struggle to piece together the changes around the world that leave open the possibility for improved outcomes in care This book seeks to boldly rectify this situation by identifying innovative models of service delivery training education research funding and payment systems that have proven to be exemplary in implementation and scalability or have potential for scalability Chapters describe specific barriers and challenges illuminating effective strategies for improved outcomes This text is the first peer-reviewed resource to gather prestigious physicians in global mental health from around the world and disseminate their expertise in the medical community at large in a format that is updateable making it a truly cutting edge resource in a world constantly changed by medical scientific and technological advances **Innovations in Global Mental Health** is the ultimate resource for psychiatrists psychologists primary care physicians hospitalists policy makers and all medical professionals at the forefront of global mental health and its implications for the future

Mental Health and Human Rights Michael Dudley, Derrick Silove, Fran Gale, 2012-06-21 People with mental disorders often suffer the worst conditions of life This book is the first comprehensive survey of the mental health human rights relationship It examines the relationships and histories of mental health and human rights and their interconnections with law culture ethnicity class economics biology and stigma *Mental Disability and the European Convention on Human Rights* Peter Bartlett, Oliver Lewis, Oliver Thorold, 2006-10-01 Mental disability has come of age as a subject of concern under the European Convention on Human Rights It was only in 1979 that the first significant decision of the ECHR was decided on the subject and after that cases were relatively few for many years It is only recently that this has begun to change This volume provides an account of where the law currently stands and speculation as to how it may develop The initial chapters deal with substantive aspects of Convention rights including issues

of detention in institutions conditions within institutions medical treatment problems associated with guardianship and others The final two chapters move to discuss the practicalities of litigation The book concludes with a number of appendices primarily the primary international legal materials of relevance to mental disability rights under the ECHR and the relevant recommendations and principles from the Council of Europe It is hoped that this volume in addition to shedding light on where the law currently stands will offer practical guidance to lawyers concerning the mechanics of representing people with mental disabilities
