Uncertainty

- Most intelligent systems have some degree of uncertainty associated with them.

- The types of uncertainty that can occur in KBS may be caused by problems with the data.

1. Data might be missing or unavailable.
2. Data might be present but unreliable or ambiguous due to measurement errors, multiple conflicting measurements etc.
3. The representation of the data may be imprecise or inconsistent.
4. Data may just be user's best guess.
5. Data may be based on defaults and the defaults may have exceptions.

    Uncertainty and Intelligent Systems Bernadette Bouchon,Bernadette Bouchon-Meunier,Lorenza Saitta,Ronald R. Yager,1988-06-08 This book contains the papers presented at the 2nd IPMU Conference held in Urbino Italy on July 4 7 1988 The theme of the conference Management of Uncertainty and Approximate Reasoning is at the heart of many knowledge based systems and a number of approaches have been developed for representing these types of information The proceedings of the conference provide on one hand the opportunity for researchers to have a comprehensive view of recent results and on the other bring to the attention of a broader community the potential impact of developments in this area for future generation knowledge based systems The main topics are the following frameworks for knowledge based systems representation scheme neural networks parallel reasoning schemes reasoning techniques under uncertainty non monotonic and default reasoning evidence theory fuzzy sets possibility theory Bayesian inference approximate reasoning information theoretical approaches knowledge acquisition and automated learning   **Uncertainty in Intelligent and Information Systems** Bernadette Bouchon-Meunier,Ronald R. Yager,Lotfi Asker Zadeh,2000 This book is a collection of articles on the technologies needed for the construction of intelligent and information systems and particularly on the role of uncertainty The articles written by some of the world s leading experts cover the management of uncertainty and the modeling of intelligent and information systems Issues related to optimization and learning in the face of uncertainty are discussed Some of the articles describe applications to data fusion document retrieval risk management and nuclear plant control Applications to the automation of human sensory skills are also presented Techniques drawn from the disciplines of fuzzy logic neural networks genetic algorithms and other constituents of soft computing are used throughout the book

in Intelligent Systems is a complete and accessible account of the theoretical foundations and computational methods that underlie plausible reasoning under uncertainty The author provides a coherent explication of probability as a language for reasoning with partial belief and offers a unifying perspective on other AI approaches to uncertainty such as the Dempster Shafer formalism truth maintenance systems and nonmonotonic logic The author distinguishes syntactic and semantic approaches to uncertainty and offers techniques based on belief networks that provide a mechanism for making semantics based systems operational Specifically network propagation techniques serve as a mechanism for combining the theoretical coherence of probability theory with modern demands of reasoning systems technology modular declarative inputs conceptually meaningful inferences and parallel distributed computation Application areas include diagnosis forecasting image interpretation multi sensor fusion decision support systems plan recognition planning speech recognition in short almost every task requiring that conclusions be drawn from uncertain clues and incomplete information Probabilistic Reasoning in Intelligent Systems will be of special interest to scholars and researchers in AI decision theory statistics logic philosophy cognitive psychology and the management sciences Professionals in the areas of knowledge based systems operations research engineering and statistics will find theoretical and computational tools of immediate practical use The book can also be used as an excellent text for graduate level courses in AI operations research or applied probability
