Occupational Noise and Workplace Acoustics Dariusz Pleban, 2020-09-01 Modern noise research and assessment techniques are commonly used in the workplace and our personal living environment. Occupational Noise and Workplace Acoustics presents new innovative advanced research and evaluation methods of parameters characterizing acoustic field and noise in the working environment, as well as acoustic properties of rooms and noise reduction measures. This includes acoustic field visualization methods, field imaging techniques, wireless sensor networks, and the Internet of Things (IoT) optimization methods using genetic algorithms, acoustic quality assessment methods for rooms, and methods for measuring ultrasonic noise in the frequency range of 10-40 kHz. This book is a valuable resource for individuals and students interested in the areas of acoustic and sound engineering, as it provides the latest techniques and methods in the field of noise reduction and improvement of acoustic comfort. Innovative and advanced acoustic field visualization techniques for those with an auditory impairment, explains noise reduction through proper workplace design, discusses use of wireless sensor networks and the IoT for monitoring noise, and provides acoustic quality assessment methods. The authors' intention to expound on advanced issues in a lucid and accessible way was rewarded with success. In the book, an expert will find a number of hints helpful in solving actual problems, whereas a layperson will be able to form a view on challenges facing contemporary technology. What should also be emphasized is the book's soundness in documenting these advanced theses and postulates with diligently conducted empirical research. Despite a wide thematic range, the book is written consistently.

and under no circumstances can be considered a collection of randomly selected problems The content corresponds fully to the title The authors are consistent in acquainting the reader with topical scientific issues concerning assessment of acoustic hazards and the methodology of combating them Professor Zbigniew D browski BEng PhD DSc Warsaw University of Technology **Economic World** ,1991 Closing the Service Gap Benjamin Laker,Lebene Richmond Soga,Yemisi Bolade-Ogunfodun,2023-04-07 How connected are your customers employees and organisation As technology advances and customer expectations rise the most sustainable profitable and realistic way businesses can succeed in the future is by connecting their customers employees and organisation Following in the footsteps of some of the world s largest companies this book shows you how to transform your business culture using technology to connect the three most important stakeholders the customers employees and the organisation and deliver value to each in turn This model is best recognised as RenDanHeyi a Chinese term that means each employee Ren the needs of each customer Dan and the connection between the two Heyi With practical steps tips and case studies this book helps you to build and implement a strategy to close the service gap in your organisation Understand how to use the RenDanHeyi model to connect your employees customers and organisation Use new or existing technology to link customer expectations to employee activities and craft job roles and workforce planning strategy around customer needs Create a connected organisation that generates sustainable and scalable revenue for the business Transform your leadership from one that delegates to one that empowers and enables employees
