Women And Japanese Management:

Women and Japanese Management Alice C L Lam,2012-10-02 Standard works on the employment systems of Japanese companies deal almost exclusively with men Women however constitute the vast majority of the low wage highly flexible non core employees This book breaks new ground in examining the role of Japanese women in industry It assesses the extent to which growing pressure for equal opportunities between the sexes has caused Japanese companies to adapt their employment and personnel management practices in recent years The author puts the argument in an historical perspective covering the employment of Japanese women from the start of Japan s industrialisation up to the turning point of the 1986 Equal Employment Opportunity EEO Law She examines the background and execution of the legislation and she looks at the response of the business community In her case study of the Seibu department store which takes up the final part of the book Lam concludes that the EEO Law has not had the desired effect Gender and Japanese Management

Kimiko Kimoto,2005 Using data from surveys conducted in a department store and a supermarket Kimoto discusses the forces shaping job segregation by gender One of the main themes is the need for Japanese women s labor studies to develop the theoretical and methodological momentum required for a fuller analysis of paid work using a gender perspective Kimoto stresses the need for empirical studies to reveal the realities of workforce conditions and of job segregation by gender This is linked to another major theme the need to escape from the tendency of Japanese labor studies researchers and those working in Japanese personnel offices to think of women as necessarily disadvantaged participants in the labor market because of their household and child rearing duties Kimoto shows that this thinking serves only to prevent one from seeing how gender norms and therefore gender relations actually develop in workplaces A clear picture emerges of the reasons for women s difficulties in moving beyond the lower levels of management Women in the Japanese Workplace

Mary Saso,1990 Based in part on interviews conducted with women in Japan and the UK **The Changing Face of Japanese Management** Keith Jackson,Miyuki Tomioka,2004 The practice and perceptions of Japanese management are undergoing fundamental change This book sets out to identify the essential currents of change and explain how and why these impinge on the experience of managers in Japan Kimono in the Boardroom

Jean R. Renshaw,1999-09-23 Japanese women who comprise more than 40% of their country s workforce are essential to the Japanese economy Yet they are not typically thought of as managers at home or abroad Jean Renshaw challenges that perception in this pathbreaking book showing readers where and how an invisible evolution is occurring in Japanese business Traditional norms of lifetime employment the seniority system and the bureaucratic tightly knit nature of Japanese industry all restrict women s entry into management Despite these enormous barriers the number of Japanese women managers has almost doubled in the last ten years In an effort to discover the secrets of their success Renshaw interviewed over 150 successful Japanese women managers She explored family backgrounds personal characteristics socialization professional experiences and corporate cultures This book presents her

sometimes surprising discoveries Renshaw completes the picture by surveying the history of Japanese women in management and discussing the even newer phenomenon of Japanese women who own their own businesses An eye opening work for managers of international firms and scholars of business and women s studies *Kimono in the Boardroom* reveals the potential of the rising female managerial class to profoundly change the male dominated culture of modern Japan

Women in Management Positions in Japan. Trends, Challenges and Opportunities Heidi Günther,2009-09-14

Diploma Thesis from the year 2008 in the subject Business economics Business Management Corporate Governance grade 1 0 TU Bergakademie Freiberg Chair of Business English Business Communication and Intercultural Communication language English abstract The representation of women in management is a globally and frequently discussed phenomenon Albeit the worldwide number of female managers is continuously increasing progress is still slow and full of barriers ILO 2004 These obstacles are described as an invisible glass ceiling Negative attitudes and prejudices within organizations prevent women from climbing the career ladder Wirth 2001 However culture seems to be an important factor of influence for female management opportunities For example female managers tend to be generally less accepted in Asia than in America or Eastern Europe ILO 2004 Among Asian countries Japan is very special Although the country is one of the most developed and richest economies in the world gender equality is extremely low there UNDP 2007 Fackler 2007 Women are often hired for administrative tasks only and not allowed to pursue own careers Despite growing attempts to strengthen gender equality Japanese females are still discriminated against and expected to stick to their traditional duties as mothers wives and office flowers Faiola 2007 Ogasawara 1998 Female under representation is notably high for management positions and seems to increase with the level of seniority Wirth 2001 Consequently the Japanese glass ceiling is also known as concrete ceiling reflecting the enormous level of gender discrimination Wahlin 2007 Penketh 2008 Japan s rigid and outstanding gender inequality is strongly influenced by the national culture and its major impact on the societal role of women On the one hand the Japanese are known for their ability to change but on the other hand they always try to maintain their special Japanese identity within every aspect of life Thus fixed gender roles of men as breadwinners and women as housewives persist even in spite of growing internationalization Haak Otake 2008 According to these facts female managers in Japan turn out to be an exciting field of research They are needed but also discriminated against at the same time The objective of this diploma thesis is to examine current trends and to analyze challenges as well as existing opportunities to improve their situation

Too Few Women at the Top Kumiko Nemoto, 2016-09-15 The number of women in positions of power and authority in Japanese companies has remained small despite the increase in the number of educated women and the passage of legislation on gender equality In *Too Few Women at the Top* Kumiko Nemoto draws on theoretical insights regarding Japan's coordinated capitalism and institutional stasis to challenge claims that the surge in women's education and employment will logically lead to the decline of gender inequality and eventually improve women's status in the Japanese workplace Nemoto's interviews with diverse groups of workers at three Japanese financial companies and two cosmetics companies in Tokyo reveal the persistence of vertical sex segregation as a cost saving measure by Japanese companies Women's advancement is impeded by customs including seniority pay and promotion track based hiring of women long working hours and the absence of women leaders Nemoto contends that an improvement in gender equality in the corporate system will require that Japan fundamentally depart from its postwar methods of business management Only when the static labor market is revitalized

through adoption of new systems of cost savings employee hiring and rewards will Japanese women advance in their chosen professions Comparison with the situation in the United States makes the author s analysis of the Japanese case relevant for understanding the dynamics of the glass ceiling in U S workplaces as well

Women and Equal Employment Opportunities in Japan Alice Cheung-Ling Lam,1992 *Strategy for Diversity Management* Yoshiko Segawa (M.B.A.),Sloan School of Management,2010 Faced with a volatile global economy a rapidly shrinking population and a declining birthrate Japan needs to find ways to revamp its economic engine One solution is to increase the participation of Japanese women in the workforce Over the past decade Japanese society its government and companies have started this process Diversity Management and Work Life Balance are focus areas for executives in Japanese companies with the combined goals of increasing women s participation and leadership in the workforce and improving work life balance for all employees However there are significant obstacles to be overcome lack of gender equality in the corporate culture lack of support for work life balance barriers to promotion opportunities for women and lack of motivation on the part of women themselves Under these constraints it is necessary that each organization including my employer NTT West re consider what it has already done for diversity management and what it can do to improve the results In this thesis I will describe the diversity management strategies of several large Japanese companies Much of this information comes from the interviews I did in Tokyo in January 2010 I compare the Japanese situations and strategies to those found among U S companies and analyze the challenges faced by the Japanese firms Based on that material I propose some recommendations for Japanese individuals organizations and the government Some recommendations are learned from U S best practices and some are hybrid solutions that take into account Japanese cultural organizational customs I believe that these recommendations will be helpful not only for my employer NTT West but also for all Japanese companies struggling with Diversity Management and Japanese employees struggling with their own Work Life Balance
