Intercultural Communication with China Fred Dervin, Regis Machart, 2017-05-15 A major objective of this book is to identify the key determinants of the East and the West in the field of intercultural communication. It examines but also counterattacks essentialist and culturalist analyses of intercultural communication between China and the rest of the world. Offering a cross-country examination and comparison of drought awareness and experience, this book shows two fields of research which are complementary but rarely found side by side: the Arts and Intercultural Encounters serve as illustrations for theoretical and methodological discussions about intercultural communication between China and the West. Scholarly and media discourses will find this work thought-provoking, instructive, and informative.
