Worker Capitalism:

Worker Capitalism Keith Bradley, Alan H. Gelb, 1983 Worker Capitalism makes the case for a pragmatic government assisted program of worker and worker community ownership of businesses as a means of economic redevelopment particularly in older industrial countries Worker ownership the authors contend is a potentially superior alternative to industrial policies such as subsidies or protection They seek to isolate the factors necessary for successful employee ownership and develop a general takeover strategy Case studies of successful conversions to employee ownership and one failure from the United States Canada France and the United Kingdom conclude the book Worker Capitalism, 1996

Work Without the Worker Philip Jones, 2021-10-05 We are told that the future of work will be increasingly automated Algorithms processing massive amounts of information at startling speed will lead us to a new world of effortless labour and a post work utopia of ever expanding leisure But behind the gleaming surface stands millions of workers often in the Global South manually processing data for a pittance Recent years have seen a boom in online crowdworking platforms like Amazon's Mechanical Turk and Clickworker and these have become an increasingly important source of work for millions of people And it is these badly paid tasks not algorithms that make our digital lives possible Used to process data for everything from the mechanics of self driving cars to Google image search this is an increasingly powerful part of the new digital economy although one hidden and rarely spoken of But what happens to work when it makes itself obsolete In this stimulating work that blends political economy studies of contemporary work and speculations on the future of capitalism Phil Jones looks at what this often murky and hidden form of labour looks like and what it says about the state of global capitalism **Prison**

Labor: Capitalism Without Markets Joseph Parampathu, 2022-03-13 Prison labor remains a paradox in many ways Simultaneously sparsely studied or recorded and ubiquitous derided by labor unions and free workers as unfair competition and lauded by businesses as the only way to insource labor at the globalized price point rehabilitating prisoners through the virtue of work while punishing them through that same work prisons are in many ways the ultimate reflection of capitalism with the veneer of smiling faces removed Prisoners work not to avoid starving or to have a place to sleep but because it is a requirement of their existence In the United States all federal inmates must work and those who refuse face severe penalties including being charged exorbitant sums to reimburse the government for the pleasure of being incarcerated Prison labor remains anomalous to labor under traditional market forces but exists within and remains largely dominated by the larger economies and politics that govern its existence The prison is the final destination for the person become commodity that is the poor laborer Those unable to afford the offramps to a prison sentence end up serving time and once there the institution of the prison attempts to keep them as an employee for life The unsavory nature of prison labor as an economic force has relegated prison labor to only the most dangerous and unwanted jobs in existence for wages far below market value and insulated from any claims to benefits time off or workplace safety protocols Politically the prison labor industry in the United

States has found its niche in attempting to return outsourced jobs to the domestic market in effect moving the colonies of American empire right into its own backyard Without the economic differential power of sweatshop wages in low income countries prison wages become only marginally better than no wages particularly when factoring in the many deductions that prisons apply for court fees supervision costs and even disciplinary functions While these economic factors play a defining role in determining the realities of prison labor they exist within a larger philosophy of prison life that is ultimately capitalistic Even where the economics of prison labor bears literal resemblance to market demands prison labor remains a necessary component of the philosophy of capital s primacy over the labor pool Insulated from the market the totalitarian prison becomes the end stage of capitalism with contradictions uninhibited by class conflict and protected from the bargaining power of labor prison work is the harbinger of what free work becomes as the capitalist fantasy continues
