Working Class Experience:

A Phenomenology of Working-Class Experience Simon J. Charlesworth, 2000 This moving and challenging book by Simon Charlesworth deals with the personal consequences of poverty and class and the effects of growing up as part of a poor and stigmatized group Charlesworth examines these themes by focussing on a particular town Rotherham in South Yorkshire England and using the personal testimony of disadvantaged people who live there acquired through recorded interviews and conversations He applies to these life stories the interpretative tools of philosophy and social theory drawing in particular on the work of Pierre Bourdieu and Merleau Ponty in order to explore the social relations and experiences of a distinct but largely ignored social group The culture described in this book is not unique to Rotherham and Charlesworth argues that the themes and problems identified in this book will be familiar to economically powerless and politically dispossessed people everywhere

Land Reform and Working-Class Experience in Britain and the United States, 1800-1862 Jamie L. Bronstein, 1999 By exploring in detail land reform movements in Britain and the United States this book transcends traditional labor history and conceptions of class to deepen our understanding of the social political and economic history of both countries in the nineteenth century Although divided by their diverse experiences of industrialization and living in countries with different amounts of available land many working people in both Britain and the United States dreamed of free or inexpensive land to release them from the grim conditions of the 1840 s depressing overcrowded cities low wages or unemployment and stifling lives Focusing on the Chartist Land Company the Potters Joint Stock Emigration Society and the American National Reform movement this study analyses the ideas that motivated workers to turn to land reform the creation of working class land reform cultures and identities among both men and women and the international communication that enabled the formation of a transatlantic movement Though there were similarities in the ideas behind the land reform movements in their organizational strategies and in their relationships with other reform movements in the two countries the author s examination of their grassroots constituencies reveals key differences In the United States land reformers included small proprietors as well as artisans and factory workers In Britain by contrast at least a quarter of Chartist Land Company participants lived in cotton manufacturing towns strongholds of unpropertied workers and radical activity When the land reform movements came into contact with the organs of the press and government the differences in membership became crucial The Chartist Land Company was repressed by a government alarmed at the prospect of workers autonomy and the Potters Joint Stock Emigration Society died the natural death of straitened finances but the American land reform movement experienced some measure of success so much so that during the revolution in American political parties during the 1850 s land reform once a radical issue became a mainstream plank in the Republican platform

Working Class Experiences of Social Inequalities in (Post-) Industrial Landscapes Lars Meier, 2021-05-17 Based on qualitative research among industrial workers in a region that has undergone deindustrialisation and transformation to a service based economy this book

examines the loss of status among former manual labourers Focus lies on their emotional experiences nostalgic memories hauntings from the past and attachments to their former places of work to transformed neighbourhoods as well as to public space Against this background the book explores the continued importance of class as workers attempt to manage the declining recognition of their skills and a loss of power in an established outsider figuration A study of the transformation of everyday life and social positions wrought by changes in the social structure in urban landscapes and in the structures of feeling this examination of the dynamic of social identity will appeal to scholars of sociology anthropology and geography with interests in post industrial societies social inequality class and social identity
