Latest Green Building:

Sustainable Construction Charles J. Kibert, 2016-03-29 The leading green building reference updated with the latest advances in the field Sustainable Construction is the leading reference for the design construction and operation of high performance green buildings With broad coverage including architecture engineering and construction this book nevertheless delivers detailed information on all aspects of the green building process from materials selection to building systems and more This new fourth edition has been updated to reflect the latest codes and standards including LEED v4 and includes new coverage of carbon accounting The discussion has been updated to align with the current thinking on economics climate change net zero buildings and more with contributions by leaders in the field that illustrate the most recent shifts in thinking and practice Ancillary materials including an instructor s manual and PowerPoint presentations for each chapter help bring this clear and up to date information into the classroom making this book a valuable reference for working construction professionals Also Interactive graphics found throughout the course help activate the content and highlight key concepts for students Sustainable construction has gone mainstream and will one day be the industry norm This book provides a comprehensive reference to all aspects of a project to show you how green building concepts and principles apply throughout the design and construction process Get up to date on the latest green building codes and standards Learn about the newest technology in green building materials Adopt the best practices in procurement and delivery systems Apply sustainability concepts to all aspects of construction and design Green buildings operate at a very high level of efficiency which is made possible only by careful consideration every step of the way Appropriate land use landscaping construction materials siting water use and more all play a role in a structure s ultimate carbon footprint Sustainable Construction provides clear guidance for all aspects of green building including the most recent advances and the latest technology

Green Building Materials Ross Spiegel, Dru Meadows, 2010-11-09 GREEN BUILDING MATERIALS THE ULTIMATE USER S MANUAL TO GREEN BUILDING MATERIALS To properly select and specify green building materials successful architects need authoritative real world advice on how to select and use nontoxic recycled and recyclable products and how to integrate these products into the design process in order to capitalize on the many practical and economic advantages of going green Green Building Materials Third Edition is the most reliable up to date resource to meet today s green building challenges from reducing waste and improving energy efficiency to promoting proper code compliance and safeguarding against liability claims Written by two nationally known experts on green building methods and materials Green Building Materials Third Edition offers in depth practical information on the product selection product specification and construction process This new Third Edition is an excellent hands on guide to today s newest range of green building materials what they are where to find them how to use them effectively and how to address LEED requirements Organized by CSI MasterFormat category for fast access to specific information it features A new chapter on eco labels green

standards and product certification A new appendix providing reference information for sustainability standards and standards development organizations New sample specifications including green power requirements vegetated green roof systems rainwater harvesting and water reuse systems Revised and updated review of trends affecting the future of green building materials Updated approach and reference information for the product selection process Green Building Materials Third Edition is an essential tool for designing environmentally friendly buildings ones made from materials that preserve the Earth's natural legacy for future generations

Green Building Illustrated Francis D. K. Ching, Ian M. Shapiro, 2020-11-19 FULLY ILLUSTRATED UPDATED GUIDE TO THE STRATEGIC DESIGN OF GREEN BUILDINGS In the tradition of Building Construction Illustrated Francis D K Ching and Ian M Shapiro offer a fully illustrated guide to the theory and practice of sustainable design This guide provides architects designers and builders in the green design professional community a framework and detailed strategies for designing substantively green buildings With a focus on sustainable sites approaching and reaching net zero energy low and zero water usage minimum impact materials and superior indoor environmental quality this guide explains why we need to build green as well as green building theory and advancements in the industry This Second Edition includes All new case studies featuring geographically diverse buildings with proven zero energy performance Expanded coverage of zero energy building design as well as zero water and zero waste buildings Practical guidance for the schematic design of high performance buildings heating and hot water system selection building envelope details and integrating renewable energy Advanced strategies such as the concept of shape efficiency and the optimal location for stairwells in buildings Additional strategies for affordability in green design and construction Updated references to the latest codes and standards This Second Edition of Green Building Illustrated is an excellent resource for professionals students and those interested in the design and construction of sustainable buildings

Green Building Envelopes Sibylle Kramer, 2025-01-23 In the face of climate change architecture must transcend traditional boundaries to address pressing environmental and social challenges This volume explores the transformative potential of a visionary approach that seamlessly integrates plants and greenery into architectural design By redefining buildings as living systems these concepts enhance air quality provide acoustic insulation optimize energy efficiency and create thriving oases of biodiversity From lush rooftop gardens to verdant facades and planted interiors the featured projects showcase how innovative architects and designers are reimagining the relationship between nature people and the built environment The book highlights the diverse ways organic resources are being incorporated into contemporary constructions and how they serve as independent planning elements and design features often in synergy with cutting edge building technologies With case studies from around the globe this book celebrates the beauty functionality and necessity of green building envelopes in shaping sustainable vibrant cities

The New Net Zero Bill Maclay,2014 The new threshold for green building is not just low energy it s net zero energy In

The New Net Zero sustainable architect Bill Maclay charts the path for designers and builders interested in exploring green design's new frontier: net zero energy structures that produce as much energy as they consume and are carbon neutral. In a nation where traditional buildings use roughly 40 percent of the total fossil energy, the interest in net zero building is growing enormously among both designers interested in addressing climate change and consumers interested in energy efficiency and long-term savings. Maclay, an award-winning net zero designer whose buildings have achieved high performance goals at affordable costs, makes the case for a net zero future, explains net zero building metrics, integrated design practices, and renewable energy options, and shares his lessons learned on net zero teambuilding. Designers and builders will find a wealth of state-of-the-art information on such considerations as air, water, and vapor barriers, embodied energy, residential and commercial net zero standards, monitoring and commissioning, insulation options, costs, and more. The comprehensive overview is accompanied by several case studies which include institutional buildings, commercial projects, and residences. Both new building and renovation projects are covered in detail. The New Net Zero is geared toward professionals exploring net zero design but also suitable for nonprofessionals seeking ideas and strategies on net zero options that are beautiful and renewably powered.

Green Building RSMean, 2006-12-28. Since the widely read first edition of this book, green building has gone from a growing trend to a major force in design and construction. The chapters, case studies, resources, and cost data in this book give you the whole picture on green building, including the latest on Green building approaches, materials, systems, and standards. Energy efficiencies with energy modeling tools. Health, comfort, and productivity goals and techniques. Evaluating the cost versus value of green products over their life cycle. Specifying green building projects complete with a list of often specified products, materials, and a sample spec. Low cost green strategies and special economic incentives and funding. Assembling the green project team and commissioning the building. Deconstruction, a new chapter on this key element of sustainable building.

FEATURES This 2nd edition has been completely updated with the latest in green building technologies, design concepts, standards, and costs. It includes RSMean's Green Building Project Planning Cost Data CD-ROM at no additional cost. The CD contains more than 300 new assemblies from high efficiency HVAC and lighting to living roofs, fuel cells, gray water systems, and much more. Over 7,000 unit price line items for green materials and products. Key word index. Virtual notes to highlight individual lines. Extensive estimating reference tables. Localized costs for your geographic area.
