Four Centuries of Special Geography O.F.G. Sitwell, 2011-11-01 Geography as an academic discipline dates back to the last few decades of the nineteenth century However during the preceding centuries a large body of English language literature relevant to the field of special geography was published Four Centuries of Special Geography lists all the works published before 1888 and includes descriptions of each entry and notes on later editions Francis Sitwell has written an extensive introduction in which he provides a detailed guide to the organization and contents of the bibliography He also evaluates special geography as a genre which contributed to scholarly discourse from the sixteenth to the nineteenth centuries In addition he examines the genre as a whole and discusses its relation to the evolving world of ideas during the same time period The result of several years of data gathering this book will be a valuable research tool for anyone seeking to examine aspects of the development of the field of geography in the years before it was defined as a distinct academic discipline It will also be useful to those whose research focuses on the acquisition and transmission of geographical knowledge prior to the twentieth century in particular on the place of geography in educational curricula

Canadian Geographical Information Systems Source Book, 1994 **Learning Progressions in Geography Education** Osvaldo Muñoz Solari, Michael Solem, Richard Boehm, 2016-07-30 This book informs an international audience of teachers scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world The book represents an important contribution to learning progressions research and practice The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography The book compares educational systems and how teachers and curriculum

developers use the concept of learning progression to guide educational practices As an approach to educational research learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards The book analyzes the general conditions of learning progressions within the context of a globalized world Important themes are addressed such as knowledge acquisition in formal education measuring learning progressions in informal settings learning progressions for one curriculum standard or several standards conditions to assess progression in the learning of facts concepts and skills and multiple pathways for understanding or learning geography The contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries The book appeals to K 12 teachers school administrators policymakers researchers in geography education professors and lecturers at universities around the world

Proceedings of the Royal Geographical Society and Monthly Record of Geography Royal Geographical Society (Great Britain), 1884 *Index to the Bulletin of the American Geographical Society, 1852-1915* American Geographical Society of New York, 1918 Demographic Analysis of Latin American Immigrants in Spain Andreu Domingo, Albert Sabater, Richard R. Verdugo, 2015-01-12 This book provides a unique timely and comprehensive insight into Latin American immigrants in Spain Each chapter uses a demographic framework to examining important topics related to the experiences of Latin American immigrants in Spain like their rapid acquisition of nationality their contrasting patterns of migration and settlement compared to other immigrant groups their labour market experiences before and during the economic recession their reproductive behaviour before and after settling in Spain as well as the push and pull factors of what is regarded as one of the single biggest waves of international migration ever experienced by Spain Beyond the investigation of such pertinent topics this book addresses issues relating to the adequacy of demographic theory in explaining the presence of Latin American immigrants in Spain particularly the trailblazing presence of women among the immigrants Spain unquestionably constitutes a good example of the fact that the future of demographic growth in post transitional countries is mainly and irreversibly marked by the evolution of migratory movements while the latter factor is closely linked with the economic state of affairs In the short term at least the causal relations go from economy to demography In the long term if economic growth is linked with demographic growth as some economists hypothesise this would also be fundamental not only in the sense of growth itself but also with regard to how this might be distributed Proceedings of the Royal Geographical Society and monthly record of geography , 1884 Real Stories of the Geography Makers John Thomson Faris, 1925 **Educational**
