The New Encyclopedia of Southern Culture M. Thomas Inge, Charles Reagan Wilson, 2014-02-01 Offering a comprehensive view of the South's literary landscape past and present this volume of *The New Encyclopedia of Southern Culture* celebrates the region's ever flourishing literary culture and recognizes the ongoing evolution of the southern literary canon As new writers draw upon and reshape previous traditions southern literature has broadened and deepened its connections not just to the American literary mainstream but also to world literatures a development thoughtfully explored in the essays here Greatly expanding the content of the literature section in the original *Encyclopedia* this volume includes 31 thematic essays addressing major genres of literature theoretical categories such as regionalism the southern gothic and agrarianism and themes in southern writing such as food religion and sexuality Most striking is the fivefold increase in the number of biographical entries which introduce southern novelists playwrights poets and critics Special attention is given to contemporary writers and other individuals who have not been widely covered in previous scholarship

The Geographies of African American Short Fiction Kenton Rambsy, 2022-03-25 Perhaps the brevity of short fiction accounts for the relatively scant attention devoted to it by scholars who have historically concentrated on longer prose narratives *The Geographies of African American Short Fiction* seeks to fill this gap by analyzing the ways African American short story writers plotted a diverse range of characters across multiple locations small towns a famous metropolis city sidewalks a rural wooded area apartment buildings a pond a general store a prison and more In the process these writers highlighted the extents to which places and spaces shaped or situated racial representations Presenting African American short story writers as cultural cartographers author Kenton Rambsy documents the variety of geographical references within their short stories to show how these authors make cultural spaces integral to their artwork and inscribe their stories with layered and resonant social histories The history of these short stories also documents the circulation of compositions across dozens of literary collections for nearly a century Anthology editors solidified the significance of a core group of short story authors including James Baldwin Toni Cade Bambara Charles Chesnutt Ralph Ellison Zora Neale Hurston and Richard Wright Using quantitative information and an extensive literary dataset *The Geographies of African American Short Fiction* explores how editorial practices shaped the canon of African American short fiction

Birth controlled Amrita Pande, 2022-06-14 *Birth controlled* analyses the world of selective reproduction the politics of who gets to legitimately reproduce the future through a cross cultural analysis of three modes of controlling birth

contraception reproductive violence and repro genetic technologies It argues that as fertility rates decline worldwide the fervour to control fertility and fertile bodies does not dissipate what evolves is the preferred mode of control Although new technologies like those that assist conception or allow genetic selection may appear to be an antithesis of other violent versions of population control this book demonstrates that both are part of the same continuum All population control policies target and vilify women Black women in particular and coerce them into subjecting their bodies to state and medical surveillance Birth controlled argues that assisted reproductive technologies and repro genetic technologies employ a similar and stratified burden of blame and responsibility based on gender race class and caste To empirically and historically ground the analysis the book includes contributions from two postcolonial nations South Africa and India examining interactions between the history of colonialism and the economics of neoliberal markets and their influence on the technologies and politics of selective reproduction The book provides a critical interdisciplinary and cutting edge dialogue around the interconnected issues that shape reproductive politics in an ostensibly post population control era The contributions draw on a breadth of disciplines ranging from gender studies sociology medical anthropology politics and science and technology studies to theology public health and epidemiology facilitating an interdisciplinary dialogue around the interconnected modes of controlling birth and practices of neo eugenics **Nickelodeon** ,1918 **Southern Campus** ,1927
