Combs,2010-07-30 Fact Finding Without Facts explores international criminal fact finding empirically conceptually and normatively After reviewing thousands of pages of transcripts from various international criminal tribunals the author reveals that international criminal trials are beset by numerous and severe fact finding impediments that substantially impair the tribunals ability to determine who did what to whom These fact finding impediments have heretofore received virtually no publicity let alone scholarly treatment and they are deeply troubling not only because they raise grave concerns about the accuracy of the judgments currently being issued but because they can be expected to similarly impair the next generation of international trials that will be held at the International Criminal Court After setting forth her empirical findings the author considers their conceptual and normative implications The author concludes that international criminal tribunals purport a fact finding competence that they do not possess and as a consequence base their judgments on a less precise more amorphous method of fact finding than they publicly acknowledge Facts and Evidence Baosheng Zhang,Shijun Tong,Jing Cao,Chuanming Fan,2021-01-04 This book presents an in depth discussion on two concepts from the field of philosophy and law in order to improve our understanding of the relation between fact and evidence in judicial process Since fact finding is a difficult task for judges proof by evidence has been devised to help them access the truth However in the process of judicial fact finding there is always a gap between fact and truth This book covers a wide range of topics from reflections on the concept of fact evidence and fact finding in the field of philosophy and law to individual case studies As such it is a useful reference resource on the continuing research on the judicial proof process for students and scholars Quality Control in Fact-Finding Morten Bergsmo,2013-11-16 This book discusses how fact finding mechanisms for alleged violations of international human rights humanitarian and criminal law can be improved There has been a significant increase in the use of international internationalised and domestic fact finding mechanisms since 1992 including by the United Nations human rights system international commissions of inquiry truth and reconciliation commissions and NGOs They are analysed and assessed in detail by 19 authors under the common theme Quality Control in Fact Finding The authors include Richard J Goldstone Martin Scheinin LIU Daqun Charles Garraway David Re Simon De Smet FAN Yuwen Isabelle Lass e WU Xiaodan Dan Saxon Chris Mahony Dov Jacobs Catherine Harwood Lyal S Sunga Wolfgang Kaleck Carolijn Terwindt Ilia Utmelidze and Marina Aksenova Serge Brammertz has written the Preface and LING Yan a Foreword The book emphasises quality awareness and improvement in non criminal justice fact work This quality control approach recognises inter alia the importance of leadership in fact finding mechanisms the responsibility of individual fact finders to continuously

professionalise and the need for fact finders to be mandate centred It is an approach that invites the consideration of how the quality of every functional aspect of fact finding can be improved including work processes to identify locate obtain verify analyse corroborate summarise synthesise structure organise present and disseminate facts The book also considers regulatory approaches to enhance quality and professionalisation The Transformation of Human Rights Fact-finding Philip Alston, Sarah Knuckey, 2016 Fact finding is at the heart of human rights advocacy and is often at the center of international controversies about alleged government abuses In recent years human rights fact finding has greatly proliferated and become more sophisticated and complex while also being subjected to stronger scrutiny from governments Nevertheless despite the prominence of fact finding it remains strikingly under studied and under theorized Too little has been done to bring forth the assumptions methodologies and techniques of this rapidly developing field or to open human rights fact finding to critical and constructive scrutiny The Transformation of Human Rights Fact Finding offers a multidisciplinary approach to the study of fact finding with rigorous and critical analysis of the field of practice while providing a range of accounts of what actually happens It deepens the study and practice of human rights investigations and fosters fact finding as a discretely studied topic while mapping crucial transformations in the field The contributions to this book are the result of a major international conference organized by New York University Law School s Center for Human Rights and Global Justice Engaging the expertise and experience of the editors and contributing authors it offers a broad approach encompassing contemporary issues and analysis across the human rights spectrum in law international relations and critical theory This book addresses the major areas of human rights fact finding such as victim and witness issues fact finding for advocacy enforcement and litigation the role of interdisciplinary expertise and methodologies crowd sourcing social media and big data and international guidelines for fact finding *Hearing of the Senate Fact Finding Committee on Labor and Welfare, California State Legislature* California.
