Between Interior Architecture and Design** Jacopo Leveratto, 2021-11-18 What is the actual difference between architectural and interior design To answer the question this book looks into the actions of interior disciplines to understand what they do not only what they are In doing so it studies them through intersection to identify the essential principles that characterise this kind of design From typology to topology from context to palimpsest from space to place the result is a story particularly focused on the Italian tradition of the ideas and projects that defined a particular design sensibility that knows no limits of context or scale Statement of Interior, Italian Apartments, 1947-1993 Manolo De Giorgi, Marco Romanelli, 1994 Avery Index to Architectural Periodicals Avery Library, 1997 **100 objects of italian design La Triennale di Milano** AA. VV., 2012-01-29T00:00:00+01:00 Italian Design The Milan Triennale is an Italian State institution which together with the Municipality of Milan and the Lombardy Region is charged with preserving and promoting Italian Design as well as carrying out research in framework programs focusing on town planning architecture handicrafts industrial production fashion new media etc In its long history the Milan Triennale has always followed developments in the field of applied arts from the thirties to the post war years during the reconstruction years and the country's economic miracle and later during the economic and energy crisis of the seventies Since the eighties Milan has increasingly become an international centre of design The Triennale played a leading role in organizing important qualitative events that have enhanced the city's image Last but not least the foundation of the Museum of Design To achieve its goals the Milan Triennale has established its own Research Centre and a Permanent Collection of Italian Design The 100 objects of Italian Design on show in this exhibition have been selected from the Permanent Collection a unique qualitative and quantitative ensemble of Italy's design legacy The Permanent Collection is used as a basis for all exhibits on Italian Design at the Triennale or around the world its intention is to shed new light on the history of industrial production in Italy The pieces in the Collection illustrate the heterogeneous history of Italian design the innovation and experimentation that have made it famous and immediately recognisable thanks to the works created by its master designers Italy is a country with a thriving manufacturing industry that focuses on quality design and products in fact design represents one of the country's strategic economic resources Its good fortune and niche position on the international stage and world markets is primarily due to the system that has gradually been developed The system unites design culture and production which are influenced on the one hand by the still unrivalled works of the past for example those by Leonardo da Vinci and on the other by the vision of a future that goes beyond mere technique and the exploitation of natural resources The exhibition 100 Objects of Italian Design organised by the curator of the Collection Silvana Annicchiarico uses the objects that have made Italian design

famous all over the world to tell this story The exhibition is a way to discover the history of a country which thanks to its creativity and design is once again a leader on the world stage a role it intends to pursue and develop by welcoming all and every contribution Davide Rampello President of the Milan Triennale
