Modern Chinese Parts of Speech Guo Rui, 2018-06-18 Classification of parts of speech in Chinese is tough due to the lack of morphological differences and thus is short of in depth investigation and exploration Based on the analysis and research of nearly 40 000 Chinese characters this book elaborates on the system of Chinese parts of speech and proposes a set of criteria on their classification contributing to relevant theoretical and methodological studies To begin with it examines the common characteristics and internal hierarchies of parts of speech as well as the relationship between grammatical functions and parts of speech in modern Chinese Then it puts forward the criteria on the classification of Chinese parts of speech with a descriptive explanation of around 20 parts of speech Besides it illustrates the statistical studies on Chinese parts of speech offering data support and corpus verification to the criteria Also it analyses the system of Chinese parts of speech from the perspective of typology Specifically it elucidates the correspondence between syntactic positions and parts of speech functional differentiation of Chinese word items etc This book will be a valuable reference to researchers and students in Chinese linguistics Learners of Chinese will also be attracted by it

Word and Sentence Prosody Haruo Kubozono, 2022-11-07 This is the first comprehensive work on word and sentence prosody in Koshikijima Japanese a dialect of Japanese not fully documented in the literature It is an endangered dialect spoken by about 2 000 speakers on a small southern island in Japan Being separated from mainland dialects by the sea this dialect exhibits unique prosodic features not shared by other Japanese dialects It also exhibits considerable regional variations among the ten or more small villages that were isolated from each other until recently Based on the author's fieldwork the book analyzes word accent and intonation the two linguistic areas in which this endangered dialect exhibits unique features and remarkable regional variations within itself They include the emergence and development of a secondary H tone postlexical deletion of the primary H tone and the L boundary tone in question and vocative intonation These phenomena bear crucially on general issues in prosody including postlexical tonal neutralizations competitions between lexical and postlexical tones and the number of tones that a syllable can maximally bear The book thus demonstrates the relevance of studying an endangered language dialect in general linguistic contexts
