Kockelmans,1993-07-31 I have always had a great interest in the philosophy of science At first this interest led to reflections on the mathematical sciences 1 later my focus shifted to the natural sciences 2 during the past twenty years or so my interest has also included the behavioral social and historical sciences From the very start my interest was always combined with a concern for the history of the sciences In philosophy of science proper my main interest was not in logical methodological or even epistemological issues although I obviously

studied and taught the most important insights proposed in the leading publications in this large field of study My concern has always been predominantly ontological and in that area I have approached the relevant issues from a 4 phenomenological perspective For what follows it is perhaps of some importance to mention here that I came to phenomenology in a rather indirect way through the philosophy of Nicolai Hartmann Yet it was mainly the influence of Herman Van Breda and Alphonse De Waelhens which led me directly to Husserl s phenomenology At first I fo cused almost exclusively on Husserl s phenomenology Later I moved in the direction of the philosophy of Merleau Ponty and 1Cf Joseph J Kockelmans Philosophy of Mathematics in the Middle Ages in Dutch Langemark Vonksteen 1953 On the Mode of Being of Mathematical Entities in Dutch in Tijdschrift voor Philosophie 16 1954 pp 289 331 2Joseph J Kockelmans On Time and Space *How to Teach Natural Science in Public Schools* William Torrey Harris,1887 **The Domain of Natural Science. The Gifford Lectures Delivered in the University of Aberdeen in 1921 and 1922** ,1926 The Relevance of Natural Science to Theology W.H. Austin,1976-06-18 This book is an attempt to show that the common belief that natural science is in principle irrelevant to theological doctrines is ill founded and to explore some of the ways in which science might bear on theology The main arguments for the irrelevance thesis are examined in some detail and in each case found either to be unsound or to support only a restricted version of the thesis A distinction is drawn between direct relevance of scientific theories and scientifically established facts to theological doctrines i e the former either contradict or lend evidential support to the latter and various forms of indirect relevance It is then suggested that arguments for the irrelevance thesis are of two main types One type is based on an instrumentalist interpretation either of scientific theories as in Pierre Duhem or of religious beliefs as in R B Braithwaite In neither case it is argued here is an instrumentalist interpretation satisfactory and in both cases even if an instrumentalist interpretation is adopted science can bear on theology in important indirect ways The other main way of arguing for the irrelevance of science to theology depends on specifying distinct and mutually exclusive realms with which they are respectively concerned But ways of doing this which are sufficiently sophisticated to be plausible prove difficult to formulate coherently In this connection the approach of existentialist theologians exemplified by Karl Heim is studied as in the contrast drawn also by some linguistic philosophers between the objectivity of science and the personal commitment required by religious beliefs By way of summary and application a brief study of the doctrine of divine providence is then made in which it is argued that contemporary theologians difficulties with this doctrine result in large part from their efforts so to define theology as to exclude any possible bearing upon it of natural science Publisher **The Domain of Natural Science** Ernest William Hobson,1926 Bulletin of the Minnesota Academy of Natural Sciences with the Reports of Committees, Address of the President, for the Year ... and List of Officers and Committees Minnesota Academy of Natural Sciences,1877 **Catholic World** ,1891 **New Catholic World** ,1891 *Natural Science* ,1896 *The Personalist* Ralph Tyler Flewelling,1924
