**Shadow Tribe** Andrew H. Fisher, 2011-07-25 *Shadow Tribe* offers the first in depth history of the Pacific Northwest's Columbia River Indians the defiant River People whose ancestors refused to settle on the reservations established for them in central Oregon and Washington Largely overlooked in traditional accounts of tribal dispossession and confinement their story illuminates the persistence of off reservation Native communities and the fluidity of their identities over time Cast in the imperfect light of federal policy and dimly perceived by non Indian eyes the flickering presence of the Columbia River Indians has followed the treaty tribes down the difficult path marked out by the forces of American colonization Based on more than a decade of archival research and conversations with Native people Andrew Fisher's groundbreaking book traces the waxing and waning of Columbia River Indian identity from the mid nineteenth through the late twentieth centuries Fisher explains how despite policies designed to destroy them the shared experience of being off the reservation and at odds with recognized tribes forged far flung river communities into a loose confederation called the Columbia River Tribe Environmental changes and political pressures eroded their autonomy during the second half of the twentieth century yet many River People continued to honor a common heritage of ancestral connection to the Columbia resistance to the reservation system devotion to cultural traditions and detachment from the institutions of federal control and tribal governance At times their independent and uncompromising attitude has challenged the sovereignty of the recognized tribes earning Columbia River Indians a reputation as radicals and troublemakers even among their own people *Shadow Tribe* is part of a new wave of historical scholarship that shows Native American identities to be socially constructed layered and contested rather than fixed singular and unchanging From his vantage point on the Columbia Fisher has written a pioneering study that uses regional history to broaden our understanding of how Indians thwarted efforts to confine and define their existence within narrow reservation boundaries

**Lights and Shadows, Or, Chequered Experiences Among Some of the Heathen Tribes of Madagascar** James Richardson, 1877 *Evolve*

Graeme Findlay, 2018-10-12 Leaders work hard to develop strong leadership capabilities in today's modern organizations for

the benefit of their teams and for their own careers But sometimes conventional leadership theory fails to explain why our efforts fail to make an impact and arguably are becoming less and less successful Why would this be The answer lies in our evolutionary history Leadership is integral to our success and evolution as a species as larger better functioning groups out survived fragmented groups that did not benefit from strong leadership Leader follower relationships are therefore deeply ingrained in our brains our instincts and our behaviour But our modern world with its technology connectedness and complexity has evolved much faster than our brains and our leader follower behaviour has not caught up Evolve charts the fascinating development of our evolutionary history to provide a profound understanding of human behaviour around leadership It also establishes a framework for the modes of leadership that shape the world today Through case studies and real world examples you will gain powerful insights into the nature of leadership now More importantly these insights inform the actions you can take in your own life to enable you to become a more aware mindful impactful and successful leader
