Unconstrained Face Recognition

AN Whitehead

Unconstrained Face Recognition:

Unconstrained Face Recognition Shaohua Kevin Zhou, Rama Chellappa, Wenyi Zhao, 2006-10-11 Face recognition has been actively studied over the past decade and continues to be a big research challenge Just recently researchers have begun to investigate face recognition under unconstrained conditions Unconstrained Face Recognition provides a comprehensive review of this biometric especially face recognition from video assembling a collection of novel approaches that are able to recognize human faces under various unconstrained situations The underlying basis of these approaches is that unlike conventional face recognition algorithms they exploit the inherent characteristics of the unconstrained situation and thus improve the recognition performance when compared with conventional algorithms Unconstrained Face Recognition is structured to meet the needs of a professional audience of researchers and practitioners in industry This volume is also suitable for advanced level students in computer science

Unconstrained Face Recognition Shaohua Kevin Zhou, Ramalingam Chellappa, Wenyi Zhao, 2008-11-01 Face recognition has been actively studied over the past decade and continues to be a big research challenge Just recently researchers have begun to investigate face recognition under unconstrained conditions Unconstrained Face Recognition provides a comprehensive review of this biometric especially face recognition from video assembling a collection of novel approaches that are able to recognize human faces under various unconstrained situations The underlying basis of these approaches is that unlike conventional face recognition algorithms they exploit the inherent characteristics of the unconstrained situation and thus improve the recognition performance when compared with conventional algorithms Unconstrained Face Recognition is structured to meet the needs of a professional audience of researchers and practitioners in industry This volume is also suitable for advanced level students in computer science

Towards a Solution of Unconstrained Face Recognition Archana Sapkota, 2013

Unconstrained Face Recognition, 2004

Unconstrained Face Recognition with Occlusions Xingjie Wei, 2014

Towards a Robust Unconstrained Face Recognition Pipeline with Deep Neural Networks Yichun Shi, 2021

Face recognition is a classic problem in the field of computer vision and pattern recognition due to its wide applications in real world problems such as access control identity verification physical security surveillance etc Recent progress in deep learning techniques and the access to large scale face databases has lead to a significant improvement of face recognition accuracy under constrained and semi constrained scenarios Deep neural networks are shown to surpass human performance on Labeled Face in the Wild LFW which consists of celebrity photos captured in the wild However in many applications e g surveillance videos where we cannot assume that the presented face is under controlled variations the performance of current DNN based methods drop significantly The main challenges in such an unconstrained face recognition problem include but are not limited to lack of labeled data robust face normalization discriminative representation learning and the ambiguity of facial features caused by information loss In this thesis we propose a set of methods that attempt to address the above challenges in unconstrained

face recognition systems Starting from a classic deep face recognition pipeline we review how each step in this pipeline could fail on low quality uncontrolled input faces what kind of solutions have been studied before and then introduce our proposed methods The various methods proposed in this thesis are independent but compatible with each other Experiment on several challenging benchmarks e g IJB C and IJB S show that the proposed methods are able to improve the robustness and reliability of deep unconstrained face recognition systems Our solution achieves state of the art performance i e 95 0% TAR FAR 0 001% on IJB C dataset and 61 98% Rank1 retrieval rate on the surveillance to booking protocol of IJB S dataset

Weakly Supervised Learning for Unconstrained Face Processing Gary B. Huang,2012 Machine face recognition has traditionally been studied under the assumption of a carefully controlled image acquisition process By controlling image acquisition variation due to factors such as pose lighting and background can be either largely eliminated or specifically limited to a study over a discrete number of possibilities Applications of face recognition have had mixed success when deployed in conditions where the assumption of controlled image acquisition no longer holds This dissertation focuses on this unconstrained face recognition problem where face images exhibit the same amount of variability that one would encounter in everyday life We formalize unconstrained face recognition as a binary pair matching problem verification and present a data set for benchmarking performance on the unconstrained face verification task We observe that it is comparatively much easier to obtain many examples of unlabeled face images than face images that have been labeled with identity or other higher level information such as the position of the eyes and other facial features We thus focus on improving unconstrained face verification by leveraging the information present in this source of weakly supervised data We first show how unlabeled face images can be used to perform unsupervised face alignment thereby reducing variability in pose and improving verification accuracy Next we demonstrate how deep learning can be used to perform unsupervised feature discovery providing additional image representations that can be combined with representations from standard hand crafted image descriptors to further improve recognition performance Finally we combine unsupervised feature learning with joint face alignment leading to an unsupervised alignment system that achieves gains in recognition performance matching that achieved by supervised alignment

Adapting Grab Features for Unconstrained Face Recognition Ethan Rudd,2014
Development of a Deep Learning Scheme for Unconstrained Face Recognition Marwa Yousif Hassan Said,2016 *Brief van Henriette Margaretha Otten-Kattenburg (1896-1974) aan Wilhelmus Johannes Maria Antonius Asselbergs (1903-1968)* ,1946

Face Recognition in Unconstrained Videos with Matched Background Similarity Itay Maoz,2012
Scale-aware Multi-path Deep Neural Networks for Unconstrained Face Detection Yuguang Liu,2017 Unconstrained face detection is the task of robustly finding and locating faces in an image subject to possible variations in facial scale blur pose illumination occlusion and facial expression It is a critical first step towards a host of modern surveillance applications

including but not limited to face verification face recognition face tracking and human computer interaction Though much progress has been made in unconstrained face detection during the past decade the majority of work focuses on improving the detection robustness on variations caused by blur pose illumination occlusion and facial expression Facial scale despite its immense influence on face detection accuracy has received much less attention than have the above factors This is partially due to the fact that most traditional face detection benchmark datasets tend to collect faces of relatively large size and with modest scale variation Nonetheless in real world applications such as surveillance systems it is imperative to possess an equal ability to detect both big faces close to camera and tiny ones far away from the camera at the same time To the best of our knowledge no published face detection algorithm can detect a face as large as 1000 x 1000 pixels while simultaneously detecting another one as small as 10 x 10 pixels within a single image with similarly high accuracy We introduce a Multi Path Face Detection Network MP FDN to filter an image for simultaneously proposing and verifying different sized faces in parallel paths This is the first time that faces across a large span of scales are detected by a single network with forked detection paths More importantly the division of the paths are not handcrafted but totally based on the scale sensitivity inherent in the convolutional networks that was also discovered in this thesis for the first time MP FDN consists of two stages The first stage is a Multi Path Face Proposal Network MP FPN that suggests faces at three different scale ranges This design is based on our observation that the hierarchical multi scale layers of deep convolutional networks ConvNet can inherently represent face patterns at multiple scales In particular low level ConvNet layers are more sensitive to tiny faces while high level ConvNet layers are more discriminative to big faces To this end MP FPN utilizes three parallel outputs of the convolutional feature maps to simultaneously predict small medium and large candidate face regions respectively The second stage is a Multi Path Face Verification Network MP FVN that further eliminates false positives while including false negatives MP FVN utilizes the same three parallel paths as MP FPN For each detection path it pools features from both a face candidate region provided by MP FPN and a larger contextual region surrounding the face candidate region These facial and contextual features are then concatenated to provide a more accurate faceness probability to the face candidate Note that the network structure and hyper parameters of MP FPN and MP FVN are completely based on controlled experiments rather than being handcrafted To testify to the performance of MP FDN on the basis its ability to perform face detection we conducted comprehensive experiments on two challenging public face detection benchmark datasets WIDER FACE and FDDB datasets MP FDN consistently achieves better than the state of the art performance on both of them Specifically on the most challenging so called hard partition of WIDER FACE test set that contains faces as small as about 9 pixels and as large as more than 1000 pixels in height MP FDN outperforms the former best result by 9.8% for the Average Precision This demonstrates that MP FDN is a viable and accurate face detector for unconstrained face detection especially in the case of large scale variations

Real Time Face Recognition in Unconstrained Environment Md Manjurul

Ahsan,2018 Towards Unconstrained Face Recognition from Image Sequences A. J. Howell,Hilary Buxton,1996 Abstract This paper presents experiments using Radial Basis Function RBF networks to tackle the unconstrained face recognition problem using low resolution video information Input representations that mimic the effects of receptive field functions found at various stages of the human vision system were used with RBF networks that learnt to classify and generalise over different views of each person to be recognised In particular Difference of Gaussian DoG filtering and Gabor wavelet analysis are compared for face recognition from an image sequence RBF techniques are shown to provide excellent levels of performance where the view varies and we discuss how to relax constraints on data capture and improve preprocessing to obtain an effective scheme for real time unconstrained face recognition *Towards Automatic Face Recognition in Unconstrained Scenarios* ,2008 **Unconstrained-Pose 2D Face Recognition** Rahimzadeh Arashloo Shervin,2015-07-24 The book presents a 2D face recognition system using Markov random field matching methodology for establishing dense correspondences between a pair of images in the presence of pose changes and self occlusion The proposed method which exploits both shape and texture differences between images achieves very competitive performance compared to the current approaches The algorithm bypasses the need for geometric pre processing of face images By virtue of the matching methodology embedded in the algorithm the proposed approach can cope with moderate translation in and out of plane rotation scaling and perspective effects Also by employing a graphical model based approach the proposed system circumvents the need for non frontal images being available for training a pose invariant face recognition system In contrast to the state of the art approaches based on 3D models the approach operates on 2D images and bypasses the need for 3D face training data and avoids the vagaries of 3D face model to 2D face image fitting Face Recognition and Verification in Unconstrained Environments Huimin Guo,2012 *Computer Vision - ACCV 2016* Shang-Hong Lai,Vincent Lepetit,Ko Nishino,Yoichi Sato,2017-03-10 The five volume set LNCS 10111 10115 constitutes the thoroughly refereed post conference proceedings of the 13th Asian Conference on Computer Vision ACCV 2016 held in Taipei Taiwan in November 2016 The total of 143 contributions presented in these volumes was carefully reviewed and selected from 479 submissions The papers are organized in topical sections on Segmentation and Classification Segmentation and Semantic Segmentation Dictionary Learning Retrieval and Clustering Deep Learning People Tracking and Action Recognition People and Actions Faces Computational Photography Face and Gestures Image Alignment Computational Photography and Image Processing Language and Video 3D Computer Vision Image Attributes Language and Recognition Video Understanding and 3D Vision **Computer Vision - ECCV 2018** Vittorio Ferrari,Martial Hebert,Cristian Sminchisescu,Yair Weiss,2018-10-05 The sixteen volume set comprising the LNCS volumes 11205 11220 constitutes the refereed proceedings of the 15th European Conference on Computer Vision ECCV 2018 held in Munich Germany in September 2018 The 776 revised papers presented were carefully reviewed and selected from 2439 submissions The papers are organized in topical sections on learning for

vision computational photography human analysis human sensing stereo and reconstruction optimization matching and recognition video attention and poster sessions

Right here, we have countless book **Unconstrained Face Recognition** and collections to check out. We additionally meet the expense of variant types and next type of the books to browse. The normal book, fiction, history, novel, scientific research, as with ease as various further sorts of books are readily user-friendly here.

As this Unconstrained Face Recognition, it ends up being one of the favored books Unconstrained Face Recognition collections that we have. This is why you remain in the best website to look the incredible books to have.

Unconstrained Face Recognition Introduction

Unconstrained Face Recognition Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Unconstrained Face Recognition Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Unconstrained Face Recognition : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Unconstrained Face Recognition : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Unconstrained Face Recognition Offers a diverse range of free eBooks across various genres. Unconstrained Face Recognition Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Unconstrained Face Recognition Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Unconstrained Face Recognition, especially related to Unconstrained Face Recognition, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Unconstrained Face Recognition, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Unconstrained Face Recognition books or magazines might include. Look for these in online stores or libraries. Remember that while Unconstrained Face Recognition, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Unconstrained Face Recognition eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Unconstrained Face Recognition full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Unconstrained Face Recognition eBooks, including some popular titles.

FAQs About Unconstrained Face Recognition Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Unconstrained Face Recognition is one of the best book in our library for free trial. We provide copy of Unconstrained Face Recognition in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Unconstrained Face Recognition. Where to download Unconstrained Face Recognition online for free? Are you looking for Unconstrained Face Recognition PDF? This is definitely going to save you time and cash in something you should think about. If you trying to find then search around for online. Without a doubt there are numerous these available and many of them have the freedom. However without doubt you receive whatever you purchase. An alternate way to get ideas is always to check another Unconstrained Face Recognition. This method for see exactly what may be included and adopt these ideas to your book. This site will almost certainly help you save time and effort, money and stress. If you are looking for free books then you really should consider finding to assist you try this. Several of Unconstrained Face Recognition are for sale to free while some are payable. If you arent sure if the books you would like to download works with for usage along with your computer, it is possible to download free trials. The free guides make it easy for someone to free access online library for download books to your device. You can get free download on free trial for lots of books categories. Our library is the biggest of these that have literally hundreds of thousands of different products categories represented. You will also see that there are specific sites catered to different product types or categories, brands or niches related with Unconstrained Face Recognition. So depending on what exactly you are searching, you will be able to choose e books to suit your own need. Need to access completely for Campbell Biology Seventh Edition book? Access Ebook without any digging. And by having access to our ebook online or by storing it on your computer, you have convenient answers with Unconstrained Face Recognition To get started finding Unconstrained Face Recognition, you are right to find our website which has a comprehensive collection of books online. Our library is the biggest of these that have literally hundreds of thousands of different products represented. You will also see that there are specific sites catered to different categories or niches related with Unconstrained Face Recognition So depending on what exactly you are

searching, you will be able to choose ebook to suit your own need. Thank you for reading Unconstrained Face Recognition. Maybe you have knowledge that, people have search numerous times for their favorite readings like this Unconstrained Face Recognition, but end up in harmful downloads. Rather than reading a good book with a cup of coffee in the afternoon, instead they juggled with some harmful bugs inside their laptop. Unconstrained Face Recognition is available in our book collection an online access to it is set as public so you can download it instantly. Our digital library spans in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Merely said, Unconstrained Face Recognition is universally compatible with any devices to read.
