

# Family therapy techniques

Family therapy techniques address family conflict by improving communication and interaction within the family. Four main models dominate the spectrum.

## Structural family therapy

Theorizes that the family structure is responsible for its problem and that a certain level of hierarchy and boundaries are needed to remain healthy.

## Bowenian family therapy

Comprehensive approach where the goal of therapy is self-differentiation, or the ability to separate thoughts from feelings.

## Strategic family therapy

Families maintain problems through repeated responses to family interactions. Most work is done outside of the therapy session in the form of homework.

## Systemic family therapy

A family member develops symptoms to cope with the behavior of other family members. By changing one person's actions, the entire system can be altered as everyone is interconnected.
