Static Analysis Lecture Notes In Computer Science Volume 724:

Principles of Program Analysis Flemming Nielson, Hanne R. Nielson, Chris Hankin, 2015-02-27 Program analysis concerns static techniques for computing reliable approximate information about the dynamic behaviour of programs Applications include compilers for code improvement software validation for detecting errors in algorithms or breaches of security and transformations between data representation for solving problems such as the Y2K problem This book is unique in giving an overview of the four major approaches to program analysis data flow analysis constraint based analysis abstract interpretation and type and effect systems The presentation demonstrates the extensive similarities between the approaches this will aid the reader in choosing the right approach and in enhancing it with insights from the other approaches The book covers basic semantic properties as well as more advanced algorithmic techniques The book is aimed at M Sc and Ph D students but will be valuable also for experienced researchers and professionals

Algebraic and Logic Programming

Giorgio Levi, Mario Rodriguez-Artalejo, 1994-08-24 This volume constitutes the proceedings of the Fourth International Conference on Algebraic and Logic Programming ALP 94 held in Madrid Spain in September 1994 Like the predecessor conferences in this series ALP 94 succeeded in strengthening the cross fertilization between algebraic techniques and logic programming Besides abstracts of three invited talks the volume contains 17 full revised papers selected from 41 submissions the papers are organized into sections on theorem proving narrowing logic programming term rewriting and higher order programming

Verification, Model Checking, and Abstract Interpretation Agostino Cortesi, 2003-07-31 This book constitutes the thoroughly refereed post proceedings of the Third International Workshop on Verification Model Checking and Abstract Interpretation VMCAI 2002 held in Venice Italy in January 2002 The 22 revised full papers presented were carefully reviewed and selected from 41 submissions The papers are organized in topical sections on security and protocols timed systems and games static analysis optimization types and verification and temporal logics and systems

Program Analysis and Compilation, Theory and Practice Thomas Reps, Mooly Sagiv, Jörg Bauer, 2007-06-05 Reinhard Wilhelm's career in Computer Science spans more than a third of a century This Festschrift volume published to honor him on his 60th Birthday on June 10 2006 includes 15 refereed papers by leading researchers his graduate students and research collaborators as well as current and former colleagues who all attended a celebratory symposium held at Schloss Dagstuhl Germany

Mathematical Foundations of Programming Semantics Stephen Brookes, 1994-05-20 This volume is the proceedings of the Ninth International Conference on the Mathematical Foundations of Programming Semantics held in New Orleans in April 1993 The focus of the conference series is the semantics of programming languages and the mathematics which supports the study of the semantics The semantics is basically denotation The mathematics may be classified as category theory lattice theory or logic Recent conferences and workshops have increasingly emphasized applications of the semantics and mathematics The study of the semantics develops with the mathematics and the mathematics is inspired by

the applications in semantics The volume presents current research in denotational semantics and applications of category theory logic and lattice theory to semantics **Report CS-R**, 1994 *ACM Transactions on Programming Languages and Systems* Association for Computing Machinery, 2004 **Static Analysis** Pascal van Hentenryck, 1997-08-27 This book presents the refereed proceedings of the 4th International Symposium on Static Analysis SAS 97 held in Paris France in September 1997 The 23 revised papers were selected from 61 high quality submissions on the basis of at least three reviews Also included are one system demonstration three posters and six invited contributions by leading scientists The papers are organized in topical sections on procedural languages logic programming concurrency and termination Computer Science Today Jan Leeuwen, 1995-10-18 This specially commissioned volume presents a unique collection of expository papers on major topics that are representative for computer science today The 38 contributions written by internationally leading experts in the computer science area on personal invitation demonstrate the scope and stature of the field today and give an impression of the chief motivations and challenges for tomorrow s computer science and information technology This anthology marks a truly extraordinary and festive moment it is the 1000th volume published in the Lecture Notes in Computer Science series It addresses all computer scientists and anybody interested in a representative overview of the field **Proceedings**, 1999 Verification, Model Checking, and Abstract Interpretation, 2003 **Programming Languages and Systems**, 1999 **Programming Language Implementation and Logic Programming**, 1994 Rewriting Techniques and Applications, 1995 Logic Program Synthesis and Transformation Norbert E. Fuchs, 1998-09-09 This book constitutes the strictly refereed post workshop proceedings of the 7th International Workshop on Logic Program Synthesis Transformation LOPSTR 97 held in Leuven Belgium in July 1997 The 15 revised full papers presented have been through two rounds of reviewing selection from a total of initially 33 submissions The topics addressed include program synthesis program transformation program analysis tabling metaprogramming inductive logic programming A Unified Approach to Strictness Analysis and Optimising Transformations P. N. Benton, 1996 Abstract We present an inference system for translating programs in a PCF like source language into a variant of Moggi s computational lambda calculus This translation combines a simple strictness analysis with its associated optimising transformations into a single system The correctness of the translation is established using a logical relation between the denotational semantics of the source and target languages **Computer Performance Evaluation** Gu nter Haring, Gabriele Kotsis, 1994 Performance evaluation reliability and performability are key factors in the development and improvement of computer systems and computer networks This volume contains the 25 accepted and invited papers presented at the 7th International Conference on Modelling Techniques and Tools for Computer Performance Evaluation The papers focus on new techniques and the extension of existing techniques for performance and reliability analysis Tools to support performance and reliability modelling and measurement in all kinds of applications and environments are presented and the practicability and generality of the approaches are

emphasized The volume summarizes the state of the art and points out future demands and challenges and will interest both scientists and practitioners PUBLISHER S WEBSITE *Research Directions in Parallel Functional Programming* Kevin Hammond,1999-11 This volume provides a state of the art survey of research trends in parallel functional programming The text is divided into two sections the first section gives comprehensive introductions to key issues such as foundations programming constructs proof architectures and implementations the second comprises shorter summaries of research areas which are either of particular interest at the moment or which promise to provide key developments in the near future Topics covered here include coordination languages performance monitoring data flow programming explicit parallelism BSP and cost modelling Contributions have been commissioned by key researchers and practitioners in the area including several from the US and Canada where this is an area of increasing interest *Research Directions in Parallel Functional Programming* will be of interest to researchers post graduate students and practitioners in all relevant areas **Proceedings of the 1994 International Conference on Computer Languages** ,1994 *Proceedings of the ...
