Statistical Analysis of Weather Modification Experiments Edward J. Wegman, Douglas J. DePriest, 1980

Developments in probability and mathematical statistics generated by studies in meteorology and weather modification Some operational considerations in evaluation of weather modification programs a short excursion into epistemology Some approaches to statistical analysis of a weather modification experiment comparing the testing of hypotheses based on lognormal and gamma distributions A multivariate methodology for the analysis of weather modification experiments Physically meaningful covariates Some statistical aspects of weather modification studies Limitations of statistics in weather modification Comments on the reanalysis of the santa barbara II cloud seeding experiments Comments on the discussion at the workshop on the statistical design and analysis of weather modification experiments Response to the discussion Some Approaches to Statistical Analysis of a Weather Modification Experiment Ralph A. Bradley, Sushil S. Srivastava, Adolf Lanzdorf, FLORIDA STATE UNIV TALLAHASSEE DEPT OF STATISTICS., FLORIDA STATE UNIV TALLAHASSEE., 1979 Data from a weather modification experiment are examined and a number of statistical analyses reported The validity of earlier inferences is studied as are the utilities of various statistical methods The experiment is described The original analysis of North American Weather Consultants who conducted the experiment is reviewed Data summarization is reported A major approach to analysis is through the use of cloud physics covariates in regression analyses Finally a multivariate analysis is discussed It appears that the covariates may have been affected by treatment cloud seeding and that their use is invalid not only reducing error variances but removing treatment effect Some recommendations for improved design of similar future experiments are given in a concluding section including preliminary trial use of blocking by storms Author Statistical Analysis of the Elko Weather Modification Experiment, 1963-1968 Lyle D. Calvin, University of Nevada System. Desert Research Institute, 1969 **A Multivariate Methodology for the Analysis of Weather Modification Experiments** Elton Scott, FLORIDA STATE UNIV TALLAHASSEE DEPT OF STATISTICS., 1979 This paper develops applications of multivariate statistical models particularly principal component analysis to the analysis of data from weather modification experiments The efficacy of these multivariate applications is examined by applying the proposed models to data from Phase I of the Santa Barbara Convective Band Seeding Program conducted for the Navy by North American Weather Consultants Multivariate summary measures of precipitation are developed and multivariate methods are given to analyze the effects of cloud seeding on precipitation Results from these models based on the above mentioned data set are reported along with conclusions and suggestions for further work An appendix provides detailed summary statistics for the analyses Author *Precipitation Enhancement* Roscoe Braham, 2015-03-30 This book is the outcome of a workshop held at Park City Utah 23 25 May 1984 It is a collection of papers focusing focuses on physics of precipitation formation in clouds and the response of clouds to

glaciogenic seeding This book documents the debates and discussions that surrounded the topic of glaciogenic seeding during the time of the workshop It is interesting as a historical evidence of the scientific progress of that time
