debunks the assumption that creative people must be born with innate talents She shows how parents educational methods and cultures shaped innovators creative expression As her research clearly indicates cultural climates and attitudes including over reliance on standardized testing often work against innovation unless creativity is deliberately grown and developed Culminating over twenty years of extensive research Kim has devised original models to identify creativity in people and organizations and help it to blossom Gardening metaphors illustrate simple but powerful steps to transform creative potential into innovation She emphasizes practical steps to cultivate creative climates environment in schools in homes and at work nurture creative attitudes personality toward learning work and life and apply creative thinking skills Kim s models for creativity are complemented with evidence based methods to learn and practice creative skills in everyday life
