Sino Biological Progress in Cancer Research by Manufacturing Tough Proteins

Sino Biological is a global leader in the production and supply of affordable, high-quality recombinant, including monoclonal antibody, cytokines, and CAR-T cells. The company specializes in recombinant production and antibody development that can provide fast service (30-45 days) to the pharmaceutical, biotechnology, diagnostic, academic and scientific research industries.

With proprietary technologies and methodologies, Sino Biological has developed the world's largest collection of secreted proteins with a total of 1,000 lines, 1,000 cell strains and manufactured in recombinant expression systems that can help researchers produce their desired soluble proteins, fusion proteins, transmembrane proteins and other corresponding mammalian and microbial antibodies that represent great progress in the cancer immunotherapy space. Here have been successfully developed such as immune checkpoint, target for CAR-T and CAR-NK cell therapies, cytokines and receptors, and viral antigens.

Sino Biological has mastered the art of manufacturing difficult proteins through the state-of-the-art Sino Biological protein complex systems such as immune checkpoint targets with high efficiency in mammalian cells but it has every other option in place to meet the diverse needs of customers. To produce challenging targets such as intrinsins and cell proteins, the company develops their own transmembrane secreted cell system. By employing their technologies such as cell-free systems, the company can produce a variety of membrane proteins. Their 1000-line transmembrane system Sino Biological is quickly finding great use across

of high-quality proteins and antibodies within a short turnaround time. These proprietary technologies and infrastructure have helped to create a huge impact in cancer immunotherapy research and clinical development.

With proprietary expression platforms and high-throughput and scale-up capabilities, Sino Biological can successfully develop recombinant targeting cancer immunotherapy, no matter how difficult the project is.

All proprietary expression platforms and high-throughput and scale-up capabilities, Sino Biological can successfully develop recombinant targeting cancer immunotherapy, no matter how difficult the project is.

The capability of manufacturing high-quality recombinant proteins, particularly through our proprietary mammalian cell expression platform, has given our customers the highest opportunity in discovery of cures and other identifying a variety of a variety of a variety of cell lines. Dr. Ben Burgess, Chief Business Officer of Sino Biological.

Since Sino Biological specializes in manufacturing proteins in their patented, 100% human serum protein expression systems, they can quickly identify and optimally reconstitute. For instance, a short shelf-life of developing cancer immunotherapy

therapeutics are increased in efficiency a panel of effective response biomarkers and corresponding antibodies of a series line of cancer for research and development.

Sino Biological offers its expertise as a central research organization and continues in providing the panel of biomarker proteins for the development of cancer immunotherapy.
