Research Method and Procedure in Agricultural Economics Social Science Research Council (U.S.). Advisory Committee on Social and Economic Research in Agriculture,1928 Role of Classical Notions in the Interpretation of Modern Welfare Economics Irshad C. V.,2017-01-02 Essay from the year 2016 in the subject Economics Finance grade A University of Calicut language English abstract Welfare economics as a multidisciplinary body of knowledge aims at the best way of interpretation of human wellbeing and human endeavor From the early welfare economics to the present modern welfare economics a jubilant battle can be seen among different profounders in the welfare interpretation The methodological difference provides us an opportunity to compare different welfare economic theories and also to improve the understanding of welfare economics Classical economists were used dynamic and normative methodologies while later developments in welfare economics became narrow minded by following static and positive economics by putting assumptions mathematical and other models Classical theories were influenced in the idea of invisible hand and argue that the social welfare can be enlarged at the point where the highest level of happiness scan be enjoyed by maximum number On the other side the later developments especially by later neoclassical theories began to weaken the role of invisible hand Moreover the analysis was based on predicting social welfare by simply assuming two individual model frameworks Here vividly the scope of modern interpretation became too extreme by neglecting the role of multiple factors of a plural society in the welfare determination process Very recently few interesting welfare interpretations are also coming with multidisciplinary approach like Samuelson

s social welfare functions Sen s capability approach etc In fact the methodological battle in handling both qualitative and quantitative variables classical economists follows general equilibrium analysis while later developments focus on Paretian Condition analysis So the prediction of social welfare from the Pareto analysis of modern welfare economics has very limited scope than the classical economics

Marine Debris in Indonesia. Ecology, Social, and Economic Aspects Noir P.

Purba,Zuzy Anna,2021-04-23 Anthology from the year 2020 in the subject Environmental Sciences language English abstract Contamination of the world s oceans due to marine debris especially human engineered materials is a global problem and a challenge for many countries especially those with coastal communities Marine debris has entered a new chapter since the international and national conferences were held since the 1950s The UN United Nation in the environmental sector is known to explicitly state that marine debris has damaged the seas an oceans for a long time and has an impact on all areas of life Currently more than 1 2 trillion plastic bags are used every year around the world for daily needs About 2 million plastic bags are used every minute worldwide and around 32 million tons of plastic waste are generated annually representing 12 7% of total solid waste Every resident in Indonesia produces an average of 800 plastic bags per year This means that the use of plastic has become a necessity for humans However it is not balanced with a reduction or how it can be reused Poor waste management especially in developing countries is one problem challenge that must be addressed by the government Almost all developing countries do not have complete infrastructures and legal regulations for waste management For example in a country like Indonesia the recycling rate of waste is low at under 50% The awareness not to litter is also a cause for concern Garbage is easily found in gutters roads rivers and coasts *Vocational Education Magazine* ,1922
