## Liquid Frisket Tips & Tricks

**What is Liquid Frisket?**  
It is a water-based suspension of latex that is typically used with embossing to protect areas of your project from being decorated. Other common applications are to emboss and to use in a sealant finish.

**Application**  
Liquid Frisket can be applied with the supplied roller or an alternative synthetic paintbrush. Brush strokes to create the desired look over project. Making sure to cover the entire area intended for sealing. If you have any questions or need more information, please contact us at the bottom of your kit. We're here to help!

**Use**  
After the liquid frisket and your paper are completely dry, embossing rollers can now be used. To speed up the drying process, a fan or a hair dryer can be used. Once the liquid frisket is completely dry, the areas where the frisket is applied will seal the embossing of your project.

**Remove**  
Once the liquid frisket has been removed, the areas where it was applied will be left behind. To remove the frisket, use a brush to scrub off the frisket and use a clean cloth to wipe away the residue.
