Using The Context A:

Context: A Framework for Its Influence on Evaluation Practice Debra J. Rog, Jody L. Fitzpatrick, Ross F.

Conner, 2012-09-06 Context is a force in evaluation It shapes our practice influencing how we approach and design our studies how we carry them out and how we report our findings Context also moderates and mediates the outcomes of the programs and policies we evaluate This issue focuses squarely on the role that context plays in practice and illuminates its effect on the implementation and outcomes of programs Exploring the ways in which attending to context may improve the quality of evaluation practice the contributions span theory methods and practice in an effort to move to a more comprehensive conceptualization of context that can guide our work It Provides an historical and theoretical view of evaluators treatment of context Illustrates how context has influenced evaluation practice Presents a five area framework for guiding a contextual analysis of evaluations Introduces context assessment which provides a means of integrating context and its implications within the important stages of evaluation This is the 135th volume of the Jossey Bass quarterly report series New Directions for Evaluation an official publication of the American Evaluation Association

Context in Communication: A Cognitive View Gabriella Airenti, Marco Cruciani, Alessio Plebe, 2017-04-03 Context is what contributes to interpret a communicative act beyond the spoken words It provides information essential to clarify the intentions of a speaker and thus to identify the actual meaning of an utterance A large amount of research in Pragmatics has shown how wide ranging and multifaceted this concept can be Context spans from the preceding words in a conversation to the general knowledge that the interlocutors supposedly share from the perceived environment to features and traits that the participants in a dialogue attribute to each other This last category is also very broad since it includes mental and emotional states together with culturally constructed knowledge such as the reciprocal identification of social roles and positions The assumption of a cognitive point of view brings to the foreground a number of new questions regarding how information about the context is organized in the mind and how this kind of knowledge is used in specific communicative situations A related very important question concerns the role played in this process by theory of mind abilities ToM both in typical and atypical populations In this Research Topic we bring together articles that address different aspects of context analysis from theoretical and empirical perspectives integrating knowledge and methods derived from Philosophy of language Linguistics Cognitive Science Cognitive Neuroscience Developmental and Clinical Psychology
