Upcycling Ideas Framework

Guillaume Favre

Upcycling Ideas Framework:

The Palgrave Handbook of Practical Sustainability Robert Brinkmann, Chit Wityi Oo, 2025-05-09 This book provides a comprehensive look at practical sustainability around the world. The book takes a distinctly regional case study perspective and highlights different approaches to managing sustainability challenges. Chapters by authors from all corners of the world look at a range of sustainability issues including environmental sustainability, environmental equity and justice, and government and business approaches to sustainability. The authorship of the book is distinctly global, which provides an important perspective to this volume. Each chapter focuses on a different sustainability problem and how it was addressed in the region. Readers will take away a tremendous amount of information as to how sustainability challenges are addressed by leaders throughout the globe.

State-of-the-Art Upcycling Research and Practice Kyungeun Sung, Jagdeep Singh, Ben Bridgens, 2021-06-14 This book presents the proceedings of the first International Upcycling Symposium 2020 held on 4th September 2020 at De Montfort University DMU in Leicester, UK, online as a joint effort between DMU, Lund University, Nottingham Trent University, and Newcastle University. This book presents state of the art of research and practice in upcycling at the international level. The subject of this book, upcycling, is a term to describe the processes of creating or modifying a product from used or waste materials, components, and products which is of equal or higher quality or value than the compositional elements. This book describes new theories, approaches, and scientific research findings related to upcycling and presents examples of upcycling practice across multiple sectors, scales, and contexts. Bringing together research from over 35 multidisciplinary experts, the book discusses state of the art knowledge and practices on upcycling in different geographical, economic, socio-cultural, and technological contexts at an international level. Readers will gain fundamental understanding of upcycling with its varied definitions and forms across sectors and scales and to be informed of the latest upcycling research and practices, including valuable ideas, theories, projects, experiences, and insights by global experts.

The Upcycle William McDonough, Michael Braungart, 2013-04-16 From the authors Cradle to Cradle, the next step in how society must change the way it uses resources. Drawing on the lessons gained from 10 years of using the cradle to cradle concept, McDonough and Braungart envision the next step in the solution to our ecological crisis.

Research Journeys to Net Zero Kyungeun Sung, Patrick Isherwood, Richie Moalosi, 2024-04-19 This book provides useful insight into how academics from diverse disciplinary backgrounds such as science, engineering, technology, social science, policy, design, architecture, built environment, business, and management have been conducting research into how to realise net zero emissions to address climate change. This book explores the ways in which countries around the world have pledged to achieve net zero emissions through decarbonisation processes. It presents the highest calibre research and impact activities carried out in the UK, Europe, North America, Australia, Asia, and Africa. Such activities include conceptualisation, opportunity identification, specific case studies, demonstration of proof of concepts, provision of evidence, and education of the general public.

and knowledge transfer to companies Further to this the chapters also bring to light personal career journeys to net zero by current and future international research leaders From this book readers will gain a full understanding of net zero research via multiple disciplinary pathways be inspired by personal accounts and will learn key methodologies including quantitative and qualitative approaches The diversity of authors and topics make the book widely applicable to a range of fields and it will be of great interest to researchers students practitioners and decision makers working towards the goals of net zero and decarbonisation

The Circular Economy and the Global South Patrick Schröder, Manisha Anantharaman, Kartika Anggraeni, Timothy J. Foxon, 2019-04-12 The circular economy is a policy approach and business strategy that aims to improve resource productivity promote sustainable consumption and production and reduce environmental impacts This book examines the relevance of the circular economy in the context of developing countries something which to date is little understood This volume highlights examples of circular economy practices in developing country contexts in relation to small and medium enterprises SMEs informal sector recycling and national policy approaches It examines a broad range of case studies including Argentina Brazil China Colombia India Indonesia Kenya South Africa and Thailand and illustrates how the circular economy can be used as a new lens and possible solution to cross cutting development issues of pollution and waste employment health urbanisation and green industrialisation In addition to more technical and policy oriented contributions the book also critically discusses existing narratives and pathways of the circular economy in the global North and South and how these differ or possibly even conflict with each other Finally the book critically examines under what conditions the circular economy will be able to reduce global inequalities and promote human development in the context of the Sustainable Development Goals Presenting a unique social sciences perspective on the circular economy discourse this book is relevant to students and scholars studying sustainability in economics business studies environmental politics and development studies

Integrating Artificial Intelligence, Security for Environmental and Business Sustainability Allam Hamdan, 2025-11-05 This book delves into the crucial role of AI in addressing environmental challenges and driving sustainable business operations while emphasizing the importance of incorporating robust security measures in these endeavors Integrating Artificial Intelligence Security for Environmental and Business Sustainability is a comprehensive guide that explores the intersection of artificial intelligence AI security and sustainable practices Our proposed book provides a solid foundation in AI principles and technologies relevant to environmental and business sustainability It covers machine learning algorithms deep learning techniques and their applications in optimizing resources managing risks and enhancing decision making processes

Beyond Green Stephanie Smith, David and Alfred Smart Museum of Art, 2005 Exploring the ways in which sustainable development is being used by an emerging group of artists who combine fresh aesthetic sensibilities with constructively critical approaches to the production dissemination and display of their art this book considers environmental issues in the context of art and design
