*The Impact of Religiosity on Fertility* Sandra Hubert,2014-08-20 The work investigates the impact of religiosity of women and men on their completed fertility in an international comparison considering a long time period Sandra Hubert aims at uncovering all mechanisms through which religiosity and religious institutions can affect fertility Hence both the micro and the macro level of each country are explicitly integrated and theoretically as well as empirically dealt with The selection of differing countries rests upon the expectation that religiosity influences fertility decisions independently of the institutional

context social norms state church relations and the national degree of religious vitality These factors are intensively compared with each other at the country level At the micro level the impact of religiosity on fertility is tested by means of regressions and based on the Generations and Gender Survey Results depend on gender country the diverse religious affiliations and more
