Ernst, 2009-11-16 In this important new book on the declining health of one of America's leading environmental treasures Howard Ernst reveals a Chesapeake bay that has become functionally dead He argues that the Chesapeake Bay succumbed to a light green environmental movement that has too often

adopted a philosophy of compromise over confrontation and that has fueling a political dead zone where political leaders posture but fail to make the hard decisions needed to achieve real improvement in the Bay's health. While blunt in his evaluation of past and present failures to restore the Bay, Ernst believes that there is still time to turn the restoration effort around and sets out new dark green strategies to do so. In the concluding chapter, five long-time bay activists provide first person accounts of their battles and hopes for the future. Hailed by Robert F. Kennedy Jr. as a must-read for anyone concerned about environmental protection, this challenging book provides a wake-up call for everyone concerned about the future of the Chesapeake Bay and other ecological treasures throughout America.

This is an excellent introduction to an important topic. *Media International Australia: Environmental Communication and the Public Sphere* is the first comprehensive undergraduate textbook in the growing field of environmental communication. It takes as its theme the role of communication in influencing the ways in which we perceive the environment, as well as what actions we and others take in our relations to the natural world. The text blends scholarship and hands-on experiences to provide a theory-based and coherent description of the concrete communication practices and sites in the debates over environment protection. The level of presentation targets upper-level undergraduate students in speech communication, environmental studies, English journalism, political science, and sociology. Additional theory and vocabulary are introduced as are case studies and examples for closer examination of the principal sites and practices of environmental communication, including forums for public participation, advocacy campaigns, media coverage of environmental stories, risk communication, and models of dispute settlement.

Key Features: Provides a core text, broad and theoretically coherent coverage that covers all of the basic areas of environmental communication. Draws on the author's experiences as president of the largest U.S. environmental group. Summarizes current scholarship in the area and makes accessible many of the practices of media corporations and advocacy groups that are not readily available in public sources. Gives students insight into the practical ways to participate publicly in influencing the decisions of governmental agencies.
